Handbook of Innovative Career Counselling-Jacobus G. Maree 2019-07-20 This book examines a topic widely regarded as the most pressing in career counselling today, i.e., how to ensure that everyone receives career counselling and that all workers have the opportunity to engage in sustainable, decent work. The author holds that career counselling should not only advance workers' self- and career construction, helping them design successful career-lives and make social contributions, and live purposeful lives - it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration, and communication skills. In this way the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients 'flourish' rather than merely 'survive' in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution (Work 4.0).

Throughout the text, case studies, informational sidebars, and experiential activities make for a more engaging learning experience and encourage additional contemplation of chapter content. This new edition features new, updated, and expanded content throughout; the division of career counseling in schools into separate chapters for K-8th grade, high school, and college, including traditional, hybrid, and online campuses; and an online instructor's manual with student resources, offering material to enhance the pedagogical features of the text.

Career Counseling for African Americans-W. Bruce Walsh 2000-12-01 This book is the first edited volume devoted exclusively to career counseling with African Americans. African Americans are now at parity with the graduation rates of White Americans, yet disparities in employment continue to abound. At the same time the job market is changing and in need of more highly qualified workers, society must begin to understand the career and employment needs of Black Americans if it is to more effectively utilize this available market resource. Recent data indicates that stronger economies have a competitive edge if they have a more diverse workforce. More effective career counseling must be provided for African Americans so that they can become more thoroughly integrated in the world of work, thus creating stronger economies for society and more satisfying and challenging lives for this segment of the United States. Career Counselors need to be trained to effectively interact with African Americans. This volume begins to shed more light on just how to do that. This book presents nine significant topics focusing on career counseling for African Americans: *basic issues and concepts; *career assessment; *career counseling with African Americans; *career counseling with dual career African American couples; *career transition issues; *affirmative career counseling with African American women; *career counseling in non-traditional career fields; *the impact of the glass ceiling on the career development of African Americans; and *future directions in career counseling theory, research, and practice with African Americans.

Career Counselling and Guidance in the Workplace-Melinde Coetzee 2007 The average 21st-century career is one of constant change: an individual can no longer expect to remain with one organisation his or her entire life, achieving managerial status through natural progression. On the other hand, younger or less qualified workers find it difficult to enter the labour market because of a lack of skills or experience. The text explains the role of the career counsellor within the organisation; discusses the key concepts that influence career behaviour; explains the use of counselling and guidance tools and techniques; offers insight into the profession and practice of career counselling; and provides guidance within an international and a South African context. Integrating theoretical and practical perspectives, this book offers a comprehensive overview of career counselling and guidance services, practices, tools and techniques in an organisational context.
