Cassell's Atlas of Evolution-
Dougal Dixon 2001 This major
new atlas offers the first
complete look at the evolution
of the Earth, from the
beginning of the solar system
to the present-day. Its six
sections are divided into 18
chapters setting out the
geological and biological
developments of each major
geological period. The
volume's final section looks at
the ways in which the Earth
and its biosphere are still
evolving today. The
distribution today of types of
rock, geological formations,
fossils and modern species
are explained, and the
processes of natural evolution
and of landscape formation
through plate tectonics are
revealed here as never before.
