A Course Book in English Grammar-Dennis Freeborn 1995-07-05 The study of language in written texts and transcripts of speech is greatly helped by a student's abilityBB to identify and describe those prominent features of the grammar which make one variety of English different from another. A Course Book in English Grammar looks at many of the problems encountered by students and encourages them to find their own answers and to assess hypotheses about grammatical description. There are activities at each step, using authentic written and spoken data. Using 'real' texts avoids the faking of evidence to be found in some traditional grammar books, and interesting problems of analysis that arise in such texts are a source of useful discussion. The book has been thoroughly revised and expanded for this second edition, which contains additional chapters and material. A new opening chapter discusses the concept of 'grammatically correct English' and the differences between descriptive, prescriptive and proscriptive approaches to the writing of grammar books. The book is a systematic description of Standard English, and examples of contemporary spoken dialectal grammar are introduced and analysed to illustrate the differences between standard and nonstandard usage. A Course Book in English Grammar will prove invaluable to all students of English Language.

Charley Harper's Birds-Charley Harper 2013-01-15 During his lifetime, artist Charley Harper (American, 19222007) painted lots and lots of birds. He was raised on a farm in West Virginia, & as a kid he explored the woods and fields near his home, sketching the critters he saw. When he grew up, he developed a unique artistic style. Instead of recording every small detail of his wild subjects, he simplified each animal to its most basic elements. Rather than drawing every feather on a bird, for example, he just drew bold, colorful shapes for the wings, body, beak, and tail. And he always highlighted each animals most familiar featuresthe blur of a hummingbirds beating wings, for example, or the bright red crest of a cardinal. Fifty different birds drawn by Charley Harper are included in this sticker book. Charley wanted his art to show us the amazing variety in nature & how all living things are dependent on each other. Maybe these stickers will inspire you to learn more about
