Microsoft Azure- Marshall Copeland 2015-10-08 Written for IT and business professionals, this

book provides the technical and business insight needed to plan, deploy and manage the services provided by the Microsoft Azure cloud. Find out how to integrate the infrastructure-as-a-service (IaaS) and platform-as-a-service (PaaS) models with your existing business infrastructure while maximizing availability, ensuring continuity and safety of your data, and keeping costs to a minimum. The book starts with an introduction to Microsoft Azure and how it differs from Office 365—Microsoft's 'other' cloud. You'll also get a useful overview of the services available. Part II then takes you through setting up your Azure account, and gets you up-and-running on some of the core Azure services, including creating web sites and virtual machines, and choosing between fully cloud-based and hybrid storage solutions, depending on your needs. Part III now takes an in-depth look at how to integrate Azure with your existing infrastructure. The authors, Anthony Puca, Mike Manning, Brent Rush, Marshall Copeland and Julian Soh, bring their depth of experience in cloud technology and customer support to guide you through the whole process, through each layer of your infrastructure from networking to operations. High availability and disaster recovery are the topics on everyone's minds when considering a move to the cloud, and this book provides key insights and step-by-step guidance to help you set up and manage your resources correctly to optimize for these scenarios. You'll also get expert advice on migrating your existing VMs to Azure using InMage, mail-in and the best 3rd party tools available, helping you ensure continuity of service with minimum disruption to the business. In the book's final chapters, you'll find cutting edge examples of cloud technology in action, from machine learning to business intelligence, for a taste of some exciting ways your business could benefit from your new Microsoft Azure deployment.

Self-Efficacy in Changing Societies-Albert Bandura 1997-05-13 The volume addresses important issues of human adaptation and change.

Strategy Rules-David B. Yoffie 2015-04-14 The authors of the bestselling *Competing on Internet Time* (a Business Week top 10 book) analyze the strategies, principles, and skills of three of the most successful and influential figures in business—Bill Gates, Andy Grove, and Steve Jobs—offering lessons for all managers and entrepreneurs on leadership, strategy and execution. In less than a decade, Bill Gates, Steve Jobs, and Andy Grove founded three companies that would define the world of technology and transform our lives. At their peaks, Microsoft, Apple, and Intel were collectively worth some \$1.5 trillion. *Strategy Rules* examines these three individuals collectively for the first time—their successes and failures, commonalities and differences—revealing the business strategies and practices they pioneered while building their firms. David B. Yoffie and Michael A. Cusumano have studied these three leaders and their companies for more than thirty years, while teaching business strategy, innovation and entrepreneurship at Harvard and MIT. In this enlightening guide, they show how Gates, Grove, and Jobs approached strategy and execution in remarkably similar ways—yet markedly differently from their erstwhile competitors—keeping their focus on five strategic rules. *Strategy Rules* brings together the best practices in strategic management and high-tech entrepreneurship from three path-breaking entrepreneurs who emerged as CEOs of huge global companies. Their approaches to formulating strategy and building organizations offer unique insights for start-up executives as well as the heads of modern multinationals.

Soil pollution: a hidden reality-Food and Agriculture Organization of the United Nations 2018-04-30 This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.
