The WPA Guide to Idaho-Federal Writers' Project 2013-10-31 During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. While Idaho is well known for its potatoes, this WPA Guide introduces readers to many other facets of life in this Pacific Northwestern state. The first installment of the American Guide Series to be published, the guide documents the young state's response to the Great Depression by reinvigorating its science, technology, and agriculture industries. Natural elements of the Gem State are recognized, as well as the rich history of the American Indians in the area. Great photography and detailed histories enhance this historically significant guide.

Indigenous Social Work around the World-John Coates 2016-05-23 How can mainstream Western social work learn from and in turn help advance indigenous practice? This volume brings together prominent international scholars involved in both Western and indigenous social work across the globe - including James Midgley, Linda Briskman, Alean Al-Krenawi and John R. Graham - to discuss some of the most significant global trends and issues relating to indigenous and cross-cultural social work. The contributors identify ways in which indigenization is shaping professional social work practice and education, and examine how social work can better address diversity in international exchanges and cross-cultural issues within and between countries. Key theoretical, methodological and service issues and challenges in the indigenization of social work are reviewed, including the way in which adaptation can lead to more effective practices within indigenous communities and emerging economies, and how adaptation can provide greater insight into cross-cultural understanding and practice.

Fabric, Form and Flat Pattern Cutting-Winifred Aldrich 2007-07-30 One of the more difficult aspects of a designer's training is learning how to create patterns that make full use of the characteristics of individual fabrics. With an ever increasing range of fabrics available to the designer, an understanding of the relationship between fabric, form and pattern shape is now probably the most important skill a designer has to acquire. This book discusses the factors that need to be taken into consideration and offers a unique and practical method for solving problems. Its approach to design and flat pattern cutting is based on the appraisal of the fabric (according to a scale of five for each of five fabric characteristics - weight, thickness, sheer, drape and stretch) and body shape. The book is lavishly illustrated and makes use of numerous practical examples.

In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed.
