Giles Cartoons-Giles 1988

Economics for the Many-John McDonnell 2019-11-26 Our economy is rigged in favour of a wealthy elite. We need a new approach: an economics for the many. Big challenges lie ahead for our society: the rise of automation and the threat of catastrophic climate change. But so, too, do the huge possibilities presented by new technology and better ways of organising our economy in the wake of neoliberalism's failure. With the election of Jeremy Corbyn as Labour leader, and the extraordinary turnaround in Labour's fortunes in the 2017 election, we have a real opportunity to build an economy in Britain that is radically fairer, radically more democratic, and radically more sustainable. But we need the right ideas and strategies if we're going to get there. Economics for the Many, edited and with an introduction by Shadow Chancellor of the Exchequer John McDonnell, features contributions from the participants in his New Economics conferences, including Barry Gardiner, Ann Pettifor, Prem Sikka, and Guy Standing. It covers topics from housing, public ownership, and fairer international trading systems to industrial policy for the twenty-first century and how to tackle tax avoidance and regional imbalances. Together, the essays in this volume lay out a vision for a new economics, one that works for the many, not the few.

Giles Sunday Express & Daily Express Cartoons-Giles 2003

Giles's War-Tim Benson 2017-07-13 Few contemporaries captured Britain's indomitable wartime spirit as well or as wittily as the cartoonist Carl Giles. Now, for the first time, the very best of the cartoons he produced between 1939 and 1945 are brought together, including many that have not seen the light of day in over 75 years. As a young cartoonist at Reynold's News and then the Daily Express, Giles's work provided a crucial morale boost – and much-needed laughs – to a population suffering daily privations and danger, and Giles's War shows why. Here are his often hilarious takes on the great events of the war – from the Fall of France, via D-Day, to the final Allied victory – but also his wryly amusing depictions of ordinary people in extraordinary times, living in bombed-out streets, dealing with food shortages, coping with blackouts, railing against bureaucracy and everyday annoyances. It's a brilliantly funny chronicle of our nation's finest hour, as well as a fitting tribute to one of

our greatest cartoonists.

Beyond Sight-Ryan D. Giles 2018 Beyond Sight, edited by Ryan D. Giles and Steven Wagschal, explores the ways in which Iberian writers crafted images of both Old and New Worlds using the non-visual senses (hearing, smell, taste, and touch). The contributors argue that the uses of these senses are central to understanding Iberian authors and thinkers from the pre- and early modern periods. Medievalists delve into the poetic interiorizations of the sensorial plane to show how sacramental and purportedly miraculous sensory experiences were central to the effort of affirming faith and understanding indigenous peoples in the Americas. Renaissance and early modernist essays shed new light on experiences of pungent, bustling ports and city centres, and the exotic musical performances of empire. This insightful collection covers a wide array of approaches including literary and cultural history, philosophical aesthetics, affective and cognitive studies, and theories of embodiment. Beyond Sight expands the field of sensory studies to focus on the Iberian Peninsula and its colonies from historical, literary, and cultural perspectives.

The Handbook of Intergroup Communication-Howard Giles 2012-06-14 The Handbook of Intergroup Communication brings together research, theory and application on traditional as well as innovative intergroup situations, exploring the communication aspect of these groups. The volume is organized into four domains – cross-disciplinary approaches to intergroup study; types/processes of communication between groups; communication between specific group types; and arenas in which intergroup communication takes place. Editor Howard Giles worked with an internationally-based advisory board to develop and review content, and the contributors included here represent those scholars doing innovative and well-regarded work around the globe. The "intergroup" umbrella integrates and transcends many traditional conceptual boundaries in communication (including media, health, intercultural, organizational); hence the Handbook will appeal to scholars and graduate students not only in the core area of intergroup communication itself, but across varying terrains of study in communication and beyond, including intergroup relations and social psychology.

From Walt Whitman's Civil War diaries to kitchen table survivor-to-survivor storytelling following Hurricane Katrina, from social media posts from a refugee detention centre, to poetry by exiles fleeing war zones, the collection investigates trauma memoir writing as healing, as documentation of suffering and disability, and as political activism. Editors Bunty Avieson, Fiona Giles and Sue Joseph have brought together this scholarly collection as a sequel to their earlier Mediating Memory (Routledge 2018), providing a closer look at the specific concerns of trauma memoir, including conflict and intergenerational trauma; the therapeutic potential and risks of trauma life writing; its ethical challenges; and trauma memoir giving voice to minority experiences.

Global Exchanges

Global Exchanges-Ludovic Tournès 2017-10-31 Exchanges between different cultures and institutions of learning have taken place for centuries, but it was only in the twentieth century that such efforts evolved into formal programs that received focused attention from nation-states, empires and international organizations. Global Exchanges provides a wide-ranging overview of this underresearched topic, examining the scope, scale and evolution of organized exchanges around the globe through the twentieth century. In doing so it dramatically reveals the true extent of organized exchange and its essential contribution for knowledge transfer, cultural interchange, and the formation of global networks so often taken for granted today.

Moscow Rules

Moscow Rules-Keir Giles 2019 From Moscow, the world looks different. It is through understanding how Russia sees the world--and its place in it--that the West can best meet the Russian challenge. Russia and the West are like neighbors who never seem able to understand each other. A major reason, this book argues, is that Western leaders tend to think that Russia should act as a "rational" Western nation--even though Russian leaders for centuries have thought and acted based on their country's much different history and traditions. Russia, through Western eyes, is unpredictable and irrational, when in fact its leaders from the czars to Putin almost always act in their own very predictable and rational ways. For Western leaders to try to engage with Russia without attempting to understand how Russians look at the world is a recipe for repeated disappointment and frequent crises. Keir Giles, a senior expert on Russia at Britain's prestigious Chatham House, describes how Russian leaders have used consistent doctrinal and strategic approaches to the rest of the world. These approaches may seem deeply alien in the West, but understanding them is essential for successful engagement with Moscow. Giles argues that understanding how Moscow's leaders think--not just Vladimir Putin but his predecessors and eventual successors--will help their counterparts in the West develop a less crisis-prone and more productive relationship with Russia.

Girls Like Us

Girls Like Us-Gail Giles 2014-05-27 A 2015 Schneider Family Book Award Winner With gentle humor and unflinching realism, Gail Giles tells the gritty, ultimately hopeful story of two special ed teenagers entering the adult world. We understand stuff. We just learn it slow. And most of what we understand is that people what ain't Speddiess think we too stupid to get out our own way. And that makes me mad. Quincy and Biddy are both graduates of their high school's special ed program, but they couldn't be more different: suspicious Quincy faces the world with her fists up, while gentle Biddy is frightened to step outside her front door. When they're thrown together as roommates in their first "real world" apartment, it initially seems to be an uneasy fit. But as Biddy's past resurfaces and Quincy faces a harrowing experience that no one should have to go through alone, the two of them realize that they might have more in common than they thought — and more important, that they might be able to help each other move forward. Hard-hitting and compassionate, Girls Like Us is a story about growing up in a world that can be cruel, and finding the strength — and the support — to carry on.

What's Fair?

What's Fair?-Robert H. Giles What's fair? It is an old question in journalism. In 1999, it seems more difficult to answer than ever. The cycle of story, spin, and counterspin that surrounds the White House is only the most obvious part of the problem. In the past 25 years, the practice of journalism has changed enormously--particularly in the United States. The demarcation of public and private life that once ruled certain kinds of stories out-of-bounds has eroded, leaving reporters with the unenviable challenge of having to cover events whose seaminess inevitably taints all who touch them. Commercial pressures, and a tidal wave of information and entertainment media, have engulfed the news business--leaving the definitions of journalism and journalistic standards vague and uncertain. And the technology of news reporting is speeding up news cycles in ways that leave little time for sober and measured judgments. What's Fair? is a collection of essays from experts in the field that are sure to spark compelling questions and ideas about journalism and its place in our time. In "Fairness--A Struggle," journalists explore a subject that they normally share only with close friends and colleagues--their own struggles with fairness that occurred in places as different as South Africa, Washington, and the South Bronx. In "Fairness--A History," nine contributors examine the history of the fairness question, specifically the establishment of the Hutchins Commission report of 1947, which is evaluated here by a historian, a journalist and a First Amendment authority. In a comparative vein, two authorities on international communications law examine British regulations for fairness in broadcasting at the end of the 20th century. In "Fairness--A Goal," contributors explore what struggles for fairness mean in a variety of contexts, from American newsrooms to post-Communist Poland to Northern Ireland. Many discussions of fairness are either numbingly abstract or impossibly righteous. To avoid those hazards, Robert Giles and Robert Snyder have grounded this volume in stories--the kind of stories journalists tell each other and the kind of stories people tell about journalism. This volume is a testament to journalism that is free yet fair, probing yet credible and authoritative in content yet open to many voices. Robert Giles is editor-in-chief of Media Studies Journal, senior vice president of the Freedom Forum and executive director of Media Studies Center. Formerly the editor and publisher of The Detroit News, he is the author of Newsroom Management: A Guide to Theory and Practice. Robert W. Snyder is editor of the Media Studies Journal, a historian, and most recently author of Transit Talk: New York's Bus and Subway Workers Tell Their Stories. He has taught at Princeton University and New York University, from which he holds a doctorate in history.

Total Recall

Total Recall-Samantha Giles 2019 Poetry. Hybrid Genre. Women's Studies. TOTAL RECALL is, at its root, a memoir about memory. Yet in this chronology by Samantha Giles, the roots twist, double over and fold back on themselves in a narrative fractured by sexual, physical and emotional trauma. Part essay part poem, in this perseveration on how the body holds and discards the banality and sustainability of trauma, Giles questions how to know what you know when everything including your brain conspires to doubt you. "A book that so powerfully and strangely melds autobiography, poetry, ethnography, philosophical inquiry, and testimony: that would have been enough. But on top of that, Samantha Giles manages to make TOTAL RECALL a page-turner, a psychological thriller (really!) whose tension is constructed adroitly and painfully from what Georges Perec, in W: Or the Memory of Childhood, refers to as 'gaps, lapses, doubts, guesses and meagre anecdotes.' Like Perec, Giles constructs a childhood narrative by fusing memoiristic writing with otherworldly narratives, and the 'truth' emerges from the intermingling of these stories, from the silences that form between them. I could go on and on about how the book is written and the multiple forms it takes. Yet more significant than questions of form is the book's content, which is heartbreaking, captivating, and terrifying, both for the traumas it reveals, the pathologies that manipulate and deny the traumas, and the

pseudo-science of the real-life False Memory Syndrome Foundation--all presented in a voice and frame that doesn't let us off the hook. There's no self-indulgence here, no evocations of empathy or sentiment. There is, rather, brutality, affliction, and an indefinable presence in its presentation. I think this book is extraordinary."--Daniel Borzutsky

Forced Migration

Forced Migration-Alice Bloch 2018-08-24 Forced Migration: Current Issues and Debates provides a critical engagement with and analysis of contemporary issues in the field using inter-disciplinary perspectives, through different geographical case studies and by employing varying methodologies. The combination of authors reviewing both the key research and scholarship and offering insights from their own research ensures a comprehensive and up-to-date analysis of the current issues in forced migration. The book is structured around three main current themes: the reconfiguration of borders including virtual borders, the expansion of prolonged exile, and changes in protection and access to rights. The first chapters in the collection provide both context and a theoretical overview by situating current debates and issues in their historical context including the evolution of field and the impact of the colonial and post-colonial world order on forced migration and forced displacement. These are followed by chapters framed around substantive issues including deportation and forced return; protracted displacements; securitising the Mediterranean and cross-border migration practices; refugees in global cities; forced migrants in the digital age; and second-generation identity and transnational practices. Forced Migration offers an original contribution to a growing field of study, connecting theoretical ideas and empirical research with policy, practice and the lived experiences of forced migrants. The volume provides a solid foundation, for students, academics and policy makers, of the main questions being asked in contemporary debates in forced migration.

Specification Analysis in the Linear Model

Specification Analysis in the Linear Model-Maxwell L. King 2018-03-05 Originally published in 1987. This collection of original papers deals with various issues of specification in the context of the linear statistical model. The volume honours the early econometric work of Donald Cochrane, late Dean of Economics and Politics at Monash University in Australia. The chapters focus on problems associated with autocorrelation of the error term in the linear regression model and include appraisals of early work on this topic by Cochrane and Orcutt. The book includes an extensive survey of autocorrelation tests; some exact finite-sample tests; and some issues in preliminary test estimation. A wide range of other specification issues is discussed, including the implications of random regressors for Bayesian prediction; modelling with joint conditional probability functions; and results from duality theory. There is a major survey chapter dealing with specification tests for non-nested models, and some of the applications discussed by the contributors deal with the British National Accounts and with Australian financial and housing markets.
