Mrs. Everything-Jennifer Weiner 2019-06-11 From Jennifer Weiner, the #1 New York Times bestselling author of Who Do You Love and In Her Shoes comes a smart, thoughtful, and timely exploration of two sisters' lives from the 1950s to the present as they struggle to find their places—and be true to themselves—in a rapidly evolving world. Mrs. Everything is an ambitious, richly textured journey through history—and herstory—as these two sisters navigate a changing America over the course of their lives. Do we change or does the world change us? Jo and Bethie Kaufman were born into a world full of promise. Growing up in 1950s Detroit, they live in a perfect "Dick and Jane" house, where their roles in the family are clearly defined. Jo is the tomboy, the bookish rebel with a passion to make the world more fair; Bethie is the pretty, feminine good girl, a would-be star who enjoys the power her beauty confers and dreams of a traditional life. But the truth ends up looking different from what the girls imagined. Jo and Bethie survive traumas and tragedies. As their lives unfold against the background of free love and Vietnam, Woodstock and women's lib, Bethie becomes an adventure-loving wild child who dives headlong into the counterculture and is up for anything (except settling down). Meanwhile, Jo becomes a proper young mother in Connecticut, a witness to the changing world instead of a participant. Neither woman inhabits the world she dreams of, nor has a life that feels authentic or brings her joy. Is it too late for the women to finally stake a claim on happily ever after? In her most ambitious novel yet, Jennifer Weiner tells a story of two sisters who, with their different dreams and different paths, offer answers to the question: How should a woman be in the world?

The Origins of Everything in 100 Pages (More Or Less)-David Bercovici 2017-11-14 Covering 13.8 billion years in some 100 pages, a calculatedly concise, wryly intelligent history of everything, from the Big Bang to the advent of human civilization With wonder, wit, and flair--and in

record time and space--geophysicist David Bercovici explains how everything came to be everywhere, from the creation of stars and galaxies to the formation of Earth's atmosphere and oceans, to the origin of life and human civilization. Bercovici marries humor and legitimate scientific intrigue, rocketing readers across nearly fourteen billion years and making connections between the essential theories that give us our current understanding of topics as varied as particle physics, plate tectonics, and photosynthesis. Bercovici's unique literary endeavor is a treasure trove of real, compelling science and fascinating history, providing both science lovers and complete neophytes with an unforgettable introduction to the fields of cosmology, geology, climate science, human evolution, and more.

A Short History of Nearly Everything-Bill Bryson 2012-05-15 One of the

world's most beloved and bestselling writers takes his ultimate journey -- into the most intriguing and intractable questions that science seeks to answer. In A Walk in the Woods, Bill Bryson trekked the Appalachian Trail -- well, most of it. In In A Sunburned Country, he confronted some of the most lethal wildlife Australia has to offer. Now, in his biggest book, he confronts his greatest challenge: to understand -- and, if possible, answer -- the oldest, biggest questions we have posed about the universe and ourselves. Taking as territory everything from the Big Bang to the rise of civilization, Bryson seeks to understand how we got from there being nothing at all to there being us. To that end, he has attached himself to a host of the world's most advanced (and often obsessed) archaeologists, anthropologists, and mathematicians, travelling to their offices, laboratories, and field camps. He has read (or tried to read) their books, pestered them with questions, apprenticed himself to their powerful minds. A Short History of Nearly Everything is the record of this quest, and it is a sometimes profound, sometimes funny, and always supremely clear and entertaining adventure in the realms of human knowledge, as only Bill Bryson can render it. Science has never been more involving or entertaining.

How to Do Everything- 2003 This book has the answers to (just about) every question you might have. Whether you need to unclog a sink or wash your cat, you'll find clear, step-by-step instructions on how to do it.
