The Birth of a Flower-Chiara Piroddi 2019-05-23 The idea behind the boardbook collection was to attract even the youngest readers (from as young as 3 years old); to encourage them to discover subjects and areas that interest them (nature, animals, shapes, etc.) and to help them classify the things that surround them. The series is comprised of ten little books. Two are instructive, teaching shapes and numbers; five are exploratory and describe settings that are fun to discover (farm animals, wild animals, the backyard and its insects, the vegetable garden) and three are short stories about the experience of birth in nature (the birth of a little bird, of a butterfly and of a flower). Narration becomes the background for the text since touching and picture reading are the primary means of interpretation. A guiding character accompanies the child throughout each developing story until the end, where there is a summary of all the characters introduced in the book. Consistent with the Montessori approach, the child is encouraged to interact independently with his or her book. For example, in some cases, the child is asked to use a finger to trace the outline of a shape and notice its characteristics (round, sharp-edged, jagged, etc.). In others, he or she is asked to use a finger to follow a path in order to discover hidden characters and learn to associate them with their most distinctive features (the lion's tail, the rabbit's ears, the colours of vegetables, etc.). AGES: 3 plus AUTHORS: Chiara Piroddi is a psychologist and expert in Neuropsychology, specialising in Cognitive-Evolutionary Psychotherapy. She graduated in Psychology at the University of Pavia in 2007 and continued as a teaching assistant for the Chair of Physiological Psychology, and as a lecturer in Practical Neuropsychology Training at the same academic institution. She completed her practical training at the Niguarda Ca' Granda Hospital in Milan, where she has worked since 2008, acquiring clinical experience in children with serious mental and physical disabilities of all ages. Agnese Baruzzi graduated in Graphic Design at ISIA (Istituto Superiore per le Industrie Artistiche) in Urbino. She has worked as an illustrator and author since 2001, writing more than 40 children's books that have been published in Italy, the UK, Japan, Portugal, the US, France and South Korea.

Mastering the Art of Vegetable Gardening-Matt Mattus 2018-12-25 Mastering the Art of Vegetable Gardening is your "201" level course in cultivating produce. Expand your knowledge base and discover options that go beyond the ordinary! Prepare to encounter new varieties of common plant species, learn their history and benefits, and, most of all, identify fascinating new edibles to grow in your own gardens. Written by gardening expert Matt Mattus, Mastering the Art of Vegetable Gardening offers a wealth of new and exciting opportunities, alongside beautiful photography, lore, insight, and humor that can only come from someone who has grown each vegetable himself and truly loves gardening. More than 200 varieties of vegetables and herbs from the 50 most popular groups are featured in hands-on profiles that tell you how, where, and why to grow each one. Take artichokes for example: They are far from the most common edibles home growers choose, but when and if you choose to grow artichokes, you'll be fortunate to find more than one seed option, even at the better nurseries. In truth, there are nearly a dozen varieties of artichoke that are suitable for home growing in just about any climate, and each has its own unique benefits and characteristics. In Mastering the Art of Vegetable Gardening, you will find 10 types of artichoke described in through, loving detail—along with helpful tips on where and how to acquire seeds for each. And artichokes are just one item in this field-tested garden basket. Other popular and fascinating vegetables include: celtuce, Asian greens, cowpeas, carrots and parsnips, potatoes, parsley, and of course the tomato—you'll find over two dozen varieties discussed. If you are one of the more than 800,000 folks per year who has begun growing vegetables at home, Mastering the Art of Vegetable Gardening is the reference you need to pursue this rewarding activity to a whole new level of excellence, satisfaction, and success.

The Tao of Vegetable Gardening-Carol Deppe 2015-01-29 The Tao of Vegetable Gardening explores the practical methods as well as the deeper essence of gardening. In her latest book, groundbreaking garden writer Carol Deppe (The Resilient Gardener, Breed Your Own Vegetable Varieties) focuses on some of the most popular home garden vegetables—tomatoes, green beans, peas, and leafy greens—and through them illustrates the key principles and practices that gardeners need to know to successfully plant and grow just about any food crop. Deppe’s work has long been inspired and informed by the philosophy and wisdom of Tao Te Ching, the 2,500-year-old work attributed to Chinese sage Lao Tzu and the most translated book in the world after the Bible. The Tao of Vegetable Gardening is organized into chapters that echo fundamental Taoist concepts: Balance, Flexibility, Honoring the Essential Nature (your own and that of your plants), Effortless Effort, Non-Doing, and even Non-Knowing. Yet the book also offers a wealth of specific and valuable garden advice on topics as diverse as: • The Eat-All Greens Garden, a labor- and space-efficient way to provide all the greens a family can eat, freeze, and dry—all on a tiny piece of land suitable for small-scale and urban gardeners. • The growing problem of late blight and the future of heirloom tomatoes—and what gardeners can do to avoid problems, and even create new resistant varieties. • Establishing a Do-It-Yourself Seed Bank, including information on preparing seeds for long-term storage and how to “dehybridize” hybrids. • Twenty-four good places to not plant a tree, and thirty-seven good reasons for not planting various vegetables. Designed for gardeners of all levels, from beginners to experienced growers, The Tao of Vegetable Gardening provides a unique frame of reference: a window to the world of nature, in the garden and in ourselves.

New Vegetable Garden Techniques-Joyce Russell 2019-04-16 This book is ideal for beginners, improvers and those serious about growing tasty, healthy organic fruit and vegetables. It will empower readers to grow food for a family, and help work out how to get the best results. Many books give sowing and growing instructions for a multitude of crops, but few give space to the techniques and tips that make gardening easier and that help anyone to grow healthy, sustainable food. Some of the techniques are developed from Joyce's own trials and observations; others are classic techniques that are still useful now. With a bit more detail, and a step-by-step project, a technique becomes much easier to follow and understand. There's something here for everyone: whether you grow in a small back yard and want to know how to raise salad in buckets, or if you have a large allotment where you want to improve pollination, or make your own liquid feeds. The book makes several promises to its readers. Firstly, by following its advice you will grow great fruit and vegetables. Next, the knowledge you gain will save you time as well as money. Third, you'll enjoy the gardening journey and the discoveries made along the way. Fourth, you'll find greener and cleaner ways of doing things, and you'll improve your skills, methods and habits. Find out how to rotate your vegetables so they stay healthy and well-fed, to preserve choice crops for the freshest taste, to improve the soil organically and sustainably, and to produce home made fertiliser from the leaves of your comfrey crop.
