**The Age of the Marvelous**-Hood Museum of Art 1991 "Published to accompany the exhibition The Age of the Marvelous, organized by the Hood Museum of Art at Dartmouth College, this catalogue offers the most thorough treatment of the subject to date. The essays were written by a team of scholars assembled by guest curator Joy Kenseth, Associate Professor of Art History at Dartmouth College and a specialist in Italian art of the sixteenth and seventeenth centuries. Dr. Kenseth's introduction addresses both the criteria of the marvelous and the contemporary influences on this phenomenon. A second essay describes the cabinets of curiosities known as Kunst- und Wunderkammern (rooms of art and marvels), that flourished at the time. James Mirollo, Professor of English and Comparative Literature at Columbia University, then examines the aesthetics of the marvelous in literature." "The following three essays, dealing with anthropological, zoological and botanical wonders, are written by James Welu, Director of the Worcester Art Museum; William Ashworth, Associate Professor of the History of Science at

the University of Missouri; and Elisabeth MacDougall, former Director of Studies in the History of Landscape Architecture, Dumbarton Oaks." "The last three essays, describing marvels of art, are contributed by Mark Weil, Professor of Art History at Washington University, St. Louis; Arthur Wheelock, Curator of Northern Baroque Painting at The National Gallery of Art in Washington; and Zirka Filipczak, Professor of Art History at Williams College."

**Military Robots**-Jai Galliot 2015-02-28  
Philosophers have wrestled over the morality and ethics of war for nearly as long as human beings have been waging it. The death and destruction that unmanned warfare entails magnifies the moral and ethical challenges we face in conventional warfare and everyday society. Intrinsically linked are questions and perennial problems concerning what justifies the initial resort to war, who may be legitimately targeted in warfare, who should be permitted to serve the military, the collateral effects of military weaponry and the methods of determining and dealing with violations of the laws of war. This book provides a comprehensive and unifying analysis of the moral, political and social questions concerning the rise of drone warfare.
