MCITP Windows Server 2008 R2 Server/Virtualization Administrator 70-646 and 693 ExamFOCUS Study Notes and Review Questions 2012 -ExamREVIEW 2012-12-21 According to MS, a server administrator is responsible for the operations and management of an infrastructure of Windows Server 2008 R2 servers in an enterprise environment. Exam 70-646: Windows Server 2008, Server Administrator covers these topics: Planning for Server Deployment Planning for Server Management Monitoring and Maintaining Servers Planning Application and Data Provisioning Planning for Business Continuity and High Availability The 693 exam deals specifically with virtualization. Topics covered include:Designing a Virtualization StrategyDesigning the Physical and Virtual InfrastructureDesigning a Highly Available Virtual EnvironmentDesigning a Deployment StrategyDesigning a Management StrategyThe two exams share many common elements so we recommend that you study for both together. We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.

We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.

Exam 70-640-Microsoft Official Academic Course 2010-03-22 MOAC Labs Online provide students with a hosted emulation environment for working in labs designed for use with the Microsoft Official Academic Course curriculum. These labs are the hands-on software experience that is critical for students to build the skills and knowledge they need for effective work with Windows Server 2008 on the job. Give them real experience with real software, freely exploring the full environment, instead of the prescribed task flow of simulations. MOAC Labs Online simplify the implementation of your new network administration program by eliminating lab set up. All lab exercises are hosted on Microsoft servers. Only a browser and internet connection are required for their use. This will save your institution the expense of upgrading the hardware and the software in your lab. You will no longer need dedicated hard drives for each student. Students may log into their virtual lab from any machine. Distance learning is now a viable option for your IT Professional program.
