Thucydides-Thucydides 1888

Internal Combustion Engineering: Science & Technology-P.M. Weaving 2012-12-06 Sir Diarmuid Downs, CBE, FEng, FRS Engineering is about designing and making marketable artefacts. The element of design is what principally distinguishes engineering from science. The engineer is a creator. He brings together knowledge and experience from a variety of sources to serve his ends, producing goods of value to the individual and to the community. An important source of information on which the engineer draws is the work of the scientist or the scientifically minded engineer. The pure scientist is concerned with knowledge for its own sake and receives his greatest satisfaction if his experimental observations fit into an aesthetically satisfying theory. The applied scientist or engineer is also concerned with theory, but as a means to an end. He tries to devise a theory which will encompass the known experimental facts, both because an all embracing theory somehow serves as an extra validation of the facts and because the theory provides us with new leads to further fruitful experimental investigation. I have laboured these perhaps rather obvious points because they are well exemplified in this present book. The first internal combustion engines, produced just over one hundred years ago, were very simple, the design being based on very limited experimental information. The current engines are extremely complex and, while the basic design of cylinder, piston, connecting rod and crankshaft has changed but little, the overall performance in respect of specific power, fuel economy, pollution, noise and cost has been absolutely transformed.

The Catcher in the Rye-J.D. Salinger 1951

Contemporary African Literature and the Politics of Gender-Florence Stratton 1994 The influence of colonialism and race on the development of African literature has been the subject of a number of studies. The effect of patriarchy and gender, however, and indeed the contributions of African women, have up until now been largely ignored by the critics. "Contemporary African Literature and the Politics of Gender" is the first extensive account of African literature from a feminist perspective. In this first radical and exciting work Florence Stratton outlines the features of an emerging female tradition in African fiction. A chapter is dedicated to each of the works of four women writers: Grace Ogot, Flora Nwapa, Buchi Emecheta and Mariama Ba. In addition she provides challenging new readings of canonical male authors such as Chinua Achebe, Ngugi wa Thiong'o and Wole Soyinka. "Contemporary African" "Literature and the Politics of Gender" thus provides the first truly comprehensive definition of the current literary tradition in Africa.

The Old House on the Corner-Maureen Lee 2010-09-09 A moving contemporary novel set in Liverpool about the new residents of Victoria Square Macara lives in the old house on the corner. When the land is sold, she finds herself surrounded by new properties called Victoria Square. The newcomers include mismatched lovers, Kathleen and Steve; Rachel, who is attempting to forget a terrible tragedy; Sarah who is running away from an abusive husband, while Anna and Ernie are just after a quiet life. For Marie, Victoria Square is a refuge from the men who murdered her husband; for Judy, it means a fresh start after forty years of marriage to a man she'd thought she'd love for ever. But it is to Gareth - trapped in a hopeless marriage - that Victoria is particularly drawn . . .

Bomber Boys-Marianne van Velzen 2017-04-26 March 1942, Java is about to fall. An Australian military dispatch rider and a Dutch air force transport pilot embark on a frightening escape from the advancing Japanese that takes them from Bandung to a crash landing just north of Darwin. Both would later join a unique band of flyers determined to strike back at the enemy. Bomber Boys is the extraordinary and little known story of more than 100 Dutch airmen, stranded in Australia with no country to return to, who were joined by a contingent of Australians to take the RAAF's No. 18 (Netherlands East Indies) Squadron. Formed in Canberra in April 1942, the squadron flew operational coastal patrols before

eventually being relocated to the secret MacDonald Airfield, north of Pine Creek in the Northern Territory, and eventually Batchelor, near Darwin. This is, however, more than a story about the 900 bombing raids, reconnaissance missions and attacks on Japanese shipping that the squadron flew in its three years of existence under Australian control. At its heart, is a powerful and compelling story of a group of very different men, thrown together for a common purpose, and the strange and sometimes difficult friendships they formed.

Ask Me Everything-Susan Kennedy 2010 A collection of questions and answers, lists, and trivia offers facts in an ultra-accessible format.
