Penguins Vs. Puffins-Julie Beer 2017-09-12 Get ready for an epic battle of ultimate cuteness. In one corner, there's Team Penguin. In the other, Team Puffin! Which team will you be rooting for in this hilarious and adorable smackdown? Tune in to the sports match, complete with cheeky animal commentators, as penguins and puffins square off for quirky superlatives such as Most Graceful (sure you don't mean "most awkward"?), Highest Flyer (oops, penguins can't fly! I guess they lose this round!), Scariest Arch Nemesis (hint: don't ever say "gull" to a puffin!), Most Photogenic, Biggest Science Magnet -- and that's just the tip of the iceberg! This book is also loaded with all sorts of animal knowledge: the

history of the species, how they raise their young, the latest science about each, population numbers, range maps, fun facts, quizzes, and more. By the time you're done reading, you'll be a mini-expert on both animals!

7 Billion-National Geographic 2011-11-01 Sometime in late October 2011, the 7 billionth citizen of planet Earth will be born. To mark the event, National Geographic magazine commissioned seven articles that explore the fascinating issues—including demographics, food security, climate change, fertility trends, managing biodiversity—surrounding this topic, which are collected for the first time in this special ebook. Environment editor Robert Kunzig starts by sketching out a natural history of population. The issues associated with population growth seem endless: poverty, food and water supply, world health, climate change, deforestation, fertility rates, and more. In additional chapters Elizabeth Kolbert explores a new era—the “Anthropocene,” or the age of man—defined by our massive impact on the planet, which will endure long after our cities have crumbled; and takes us to the Mediterranean, where she delves into issues associated with increasing ocean acidification. In Bangladesh, Don Belt explores how the people of this crowded region can teach us about adapting to rising sea levels. In “Food Ark” we travel deep within the earth and around the globe to explore the seed banks that are preserving the variety of food species we may need to increase food production on an increasingly crowded planet. In Brazil, Cynthia Gournay explores the phenomenon of “Machisma” and shows how a mix of female empowerment and steamy soap operas helped bring down Brazil’s fertility rate and stoke its vibrant economy. Additionally we explore threats to biodiversity, and the return of cities—which may be the solution to many of our population woes. Join National Geographic on this incredible journey to explore our rapidly growing planet.

The Lost Gospel-Herbert Krosney 2006-07-04 Judas Iscariot. He's been hated and reviled through the ages as Jesus Christ's betrayer- the close friend who sells him out for 30 pieces of silver. But history also records other information about Judas Iscariot. One such reference was written in 180 by an influential Church Father named St. Irenaeus who railed against the Gospel of Judas for depicting the last days of Jesus from the perspective of the disgraced apostle. In its pages, Judas is Christ's favorite. It's a startlingly different story than the one handed down through the ages. Once it was denounced as heresy, the Gospel of Judas faded from sight. It became one of history's forgotten manuscripts. Until now. In this compelling and exhaustively researched account, Herbert

Krosney unravels how the Gospel of Judas was found and its meaning painstakingly teased from the ancient Coptic script that had hid its message for centuries. With all the skills of an investigative journalist and master storyteller, Krosney traces the forgotten gospel's improbable journey across three continents, a trek that would take it through the netherworld of the international antiquities trade, until the crumbling papyrus is finally made to give up its secrets. The race to discover the Gospel of Judas will go down as one of the great detective stories of biblical archaeology.
