Ethics for A-Level-Mark Dimmock 2017-07-31 What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Industry 4.0 for SMEs-Dominik T. Matt 2020-01-01 This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative

and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.

Banking on the Future of Asia and the Pacific-Peter McCawley
2017-04-01 This book is a history of the Asian Development Bank (ADB), a multilateral development bank established 50 years ago to serve Asia and the Pacific. Focusing on the region's economic development, the evolution of the international development agenda, and the story of ADB itself, this book raises several key questions: What are the outstanding features of regional development to which ADB had to respond? How has the bank grown and evolved in changing circumstances? How did ADB's successive leaders promote reforms while preserving continuity with the efforts of their predecessors? ADB has played an important role in the transformation of Asia and the Pacific the past 50 years. As ADB continues to evolve and adapt to the region's changing development landscape, the experiences highlighted in this book can provide valuable insight on how best to serve Asia and the Pacific in the future.

The Technological State in Indonesia-Sulfikar Amir 2012 Using a historical sociology approach, this book illustrates the formation of the technological state in Indonesia during the New Order period (1966-1998). It explores the nexus between power, high technology, development, and authoritarianism situated in the Southeast Asian context. The book discusses how the New Order regime shifted from the developmental state to the technological state, which was characterized by desire for technological supremacy. The process resulted in the establishment of a host of technological institutions and the undertaking of large-scale high-tech programs. Shedding light on the political dimension of socio-technological transformation, this book looks at the relationship between authoritarian politics and high technology development, and examines how effectively technology serves to sustain legitimacy of an authoritarian power. It explores into multiple features of the Indonesian technological state, covering the ideology of development, the politics of technocracy, the institutional structure, and the material and symbolic embodiments of high technology, and goes on to discuss the impact of globalization on the technological state. The book is an important contribution to studies on Southeast Asian Politics, Development, and Science, Technology, and Society (STS).
