On the Move-Pat-a-Cake 2017-03-09 Babies will love this bright and bold high-contrast book, perfect for sharing from birth! High-contrast colours are easy for very little babies to focus on, and along with the fun double tabs to pull, On the Move will engage and entertain babies as their eyesight and senses develop. The friendly animal characters will guide you through the book, and there are lots of extra sounds to make (beep, beep!) and fun things to spot. On the Move aids the development of babies' eyesight by using high-contrast colours and patterns, striking illustrations and pages that pull out in different directions. Babies will react with delight as they track and scan the pictures and patterns that are revealed as you pull the tabs, while the simple text prompts parent interaction. Also available: Funny Faces, Moo Peek-a-Boo, Bath Time, Animal Train, Splish, Splash

Constructing Science in Elementary Classrooms-Norman G. Lederman 2004 Solidly based on the National Science Education Standards and Benchmarks for Science Literacy, this new elementary science methods text immerses students into the context of classroom instruction through the authors' unique approach using The Teaching Cycle.The text is divided into three major sections or clusters of chapters: Goals of Science Instruction, Setting the Stage, and The Teaching Cycle. The first two sections provide the theoretical and practical foundations for instruction, while the third section provides content.Section I presents an overall view of science as a way of knowing and eventually develops an argument for why science should be included in the curriculum at all. Section II emphasizes the importance of connecting lessons and avoiding the tendency to present individual science lessons in isolation.The major content chapters comprising Section III--The Teaching Cycle (Life/Environmental Science, Physical Science, Earth and Space Science)--each incorporate the traditional topics of methods courses, e.g., demonstrations, laboratories, classroom management, assessment, developmental psychology, etc. concepts and themes common to national reforms.

The Weightlifting Encyclopedia-Arthur J. Drechsler 1998 Lifting weights is perhaps one of the fastest growing athletic activities of recent years. While many lift weights, many more would like to do so if they simply knew how to go about it. And those who know the most about weightlifting, serious competitive weightlifters, are not very accessible to the public. This book reveals the secrets of weightlifting, in material culled from more than 30 years of competitive experience, a review of more than 60 years of weightlifting literature, and extensive interviews with many of the greats of the sport.

Problematic Behaviors During Adolescence-Jeffrey J. Haugaard 2001 Adolescent Psychology courses often touch on problematic behaviors but rarely delve into the complex causes of these behaviors. Dr. Jeffrey Haugaard has written the only text to examine some of the most prevalent problematic behavior and provides students with a model for understanding the causes of such behavior. Dr. Haugaard uses college-aged individuals in chapter opening cases to draw students into the content of the chapter. The focus of the text is understanding the complex factors that contribute to developing behavior. The book is designed to be used as a supplemental text in an Adolescent Psychology course where the instructor is interested in examining the causes behind the behavior. It could also be used in a graduate Adolescent Psychopathology course.
