**Complex Lexical Units**-Barbara Schlücker 2019-01-14 Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and cross-linguistic perspective.

**The Delphic Oracle**-Joseph Fontenrose 2021-01-08 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1978.

**Word-Formation**-Peter O. Müller 2015-07-01 This handbook comprises an in-depth presentation of the state of the art in word-formation. The five volumes contain 207 articles written by leading international scholars. The XVI chapters of the handbook provide the reader, in both general articles and individual studies, with a wide variety of perspectives: word-formation as a linguistic discipline (history of science, theoretical concepts), units and processes in word-formation, rules and restrictions, semantics and pragmatics, foreign word-formation, language planning and purism, historical word-formation, word-formation in language acquisition and aphasia, word-formation and language use, tools in word-formation research. The final chapter comprises 74 portraits of word-formation in the individual languages of Europe and offers an innovative perspective. These portraits afford the first overview of this kind and will prove useful for future typological research. This handbook will provide an essential reference for both advanced students and researchers in word-formation and related fields within linguistics.

**Introducing Morphology**-Rochelle Lieber 2015-09-24 Morphology is the study of how words are put together. A lively introduction to the subject, this textbook is intended for undergraduates with relatively little background in linguistics. Providing data from a wide variety of languages, it includes hands-on activities such as 'challenge' boxes, designed to encourage students to gather their own data and analyze it, work with data on websites, perform simple experiments, and discuss topics with each other. There is also an extensive introduction to the terms and concepts necessary for analyzing words. Unlike other textbooks it anticipates the question 'is it a real word?' and tackles it head on by looking at the distinction between dictionaries and the mental lexicon. This

second edition has been thoroughly updated, including new examples and exercises as well as a detailed introduction to using linguistic corpora to find and analyze morphological data.

**The Invention of the Historic Monument**-Françoise Choay 2001 Analyzes the ambivalent phenomenon of the historic monument from the fifteenth through the twentieth centuries.

**Construction Morphology**-Geert Booij 2010-09-30 This book shows how complex words can be analysed as constructions, as pairings of forms and meanings. It advances work on the architecture of grammar, the morphology-syntax interface, the characteristics of the lexicon, and the analysis of grammaticalization. It is an important work for morphology in particular and linguistic theory in general.

**Collage City**-Colin Rowe 1983 Examines the theories of city planning and analyzes the role of the modern architect in the design of cities

**Conservation of Ruins**-John Ashurst 2007-03-14 Despite growing international awareness of the presence and significance of ruined buildings and archaeological sites, and the increasingly sophisticated technology available for the collection of data about them, these sites continue to be at risk across the globe. Conservation of Ruins defines and describes these risks, which range from neglect, to destructive archaeology, and even well-meaning intervention in the name of tourism. The book provides detailed, practical instruction on the conservation and stabilisation of ruins by structural and non-structural means, as well as describing the procedures and conditions that need to be in place to ensure the protection of our important historic sites. In considering aspects of architectural conservation, archaeology and ecology together for the first time, this book provides an integrated, holistic view of this international topic that will be essential reading for those working in this field

**Veterans and Agent Orange**-Institute of Medicine 2003-02-23 This book updates and evaluates the available scientific evidence regarding statistical associations between diseases and exposure to dioxin and other chemical compounds in herbicides used in Vietnam, focusing on new scientific studies and literature.

**Bourgeois Utopias**-Robert Fishman 2008-08-01 A noted urban historian traces the story of the suburb from its origins in nineteenth-century London to its twentieth-century demise in decentralized cities like Los Angeles.

**Harvest of death**-J. B. Neilands 1972 Herbicides: 3) The military uses of herbicides in Vietnam. 4) Herbicidal damage to Cambodia.

**The Civic Culture Transformed**-Russell J. Dalton 2014-12-31 This is the first study to demonstrate a broad shift in how citizens around the world relate to democratic politics, illustrating various manifestations of a transition from "allegiant" to "assertive" citizens.

**Trip to Hanoi**-Susan Sontag 1969 "In May of 1968, Susan Sontag visited Hanoi. The report of her trip is neither a political treatise nor a travelogue, but a sensitive observer's response to a world totally foreign to the Western mind. During her trip, Susan Sontag discovered her preconception of North Vietnam and it's people had little relevance to the actual situation. By reassessing her own point of view, Miss Sontag creates a startling picture of life in Hanoi"--Page 4 of cover.

**Folklore and Nationalism in Europe During the Long Nineteenth Century**-Timothy Baycroft 2012-07-25 Using an interdisciplinary approach, this book brings together work in the fields of history, literary studies, music, and architecture to examine the place of folklore and representations of 'the people' in the development of nations across Europe during the 19th century.

**Folklore, Nationalism, and Politics**-Felix J. Oinas 1978

**Citizenship and Involvement in European Democracies**-Jan W. Van Deth 2007-02-12 This unique study presents the results of a cross-national analysis of citizenship and participation among citizens in twelve European democracies. Research on the future and quality of contemporary democracy is usually restricted to focus either on political participation, on particular aspects of citizenship, or on social activities, exclusively. This new book offers the first empirical investigation of the relationships both between social and political involvement, and between 'small-scale' and 'large-scale' democracies. *Citizenship and Involvement in European Democracies* offers representative samples of the populations in a selection of European countries between 2000-2002, including: Denmark, Germany (East and West), Moldova, the Netherlands, Norway, Portugal, Romania, Russia, Slovenia, Spain, Sweden, and Switzerland. The leading contributors provide new theoretical insights and offer a broad conceptualization of citizenship, stimulating the ongoing discussions about the problems and challenges of democratic political systems. This book has a companion volume entitled *Social Capital and Associations in European Democracies* edited by William A. Maloney and Sigrid Roßteutscher (Routledge, 2006). Both volumes will be of great interest to students and researchers of European politics, comparative politics and sociology.

**Vaccinations and Public Concern in History**-Andrea Kitta 2012-01-30 *Vaccinations and Public Concern in History* explores vernacular beliefs and practices that surround decisions not to vaccinate. Through the use of ethnographic, media, and narrative analyses, this book explores the vernacular explanatory models used in inoculation decision-making. The research on which the book draws was designed to help create public health education programs and promotional materials that respond to patients' fears, understandings of risk, concerns, and doubts. Exploring the nature of inoculation distrust and miscommunication, Dr. Andrea Kitta identifies areas

that require better public health communication and greater cultural sensitivity in the handling of inoculation programs.

**The Moral Foundations of Trust**-Eric M. Uslaner 2002-08-29 Publisher Description

**Disaffected Democracies**-American Academy of Arts and Sciences. Project Democratic Governance 2000 It is notable that as democracy replaces other forms of governing throughout the world, citizens of the most established and prosperous democracies increasingly report dissatisfaction and frustration with their governments. This volume examines why this is so.

**Legitimacy in Global Governance**-Jonas Tallberg 2018-09-20 Legitimacy is central for the capacity of global governance institutions to address problems such as climate change, trade protectionism, and human rights abuses. However, despite legitimacy's importance for global governance, its workings remain poorly understood. That is the core concern of this volume: to develop an agenda for systematic and comparative research on legitimacy in global governance. In complementary fashion, the chapters address different aspects of the overarching question: whether, why, how, and with what consequences global governance institutions gain, sustain, and lose legitimacy? The volume makes four specific contributions. First, it argues for a sociological approach to legitimacy, centered on perceptions of legitimate global governance among affected audiences. Second, it moves beyond the traditional focus on states as the principal audience for legitimacy in global governance and considers a full spectrum of actors from governments to citizens. Third, it advocates a comparative approach to the study of legitimacy in global governance, and suggests strategies for comparison across institutions, issue areas, countries, societal groups, and time. Fourth, the volume offers the most comprehensive treatment so far of the sociological legitimacy of global governance, covering three broad analytical themes: (1) sources of legitimacy, (2) processes of legitimation and delegitimation, and (3) consequences of legitimacy.

**Higher Education and Working Life**-Päivi Tynjälä 2006 This book provides a comprehensive discussion of the relationship between higher education & working life from three different perspectives: society, higher education & the world of work. The chapters discuss the interplay between education & work both from the societal point of view & from the pedagogical perspective.

**Democracy and Trust**-Mark E. Warren 1999-10-28 Explores the implications for democracy of declining trust in government and between individuals.

**Social Traps and the Problem of Trust**-Bo Rothstein 2005-10-06 Focuses on the role of political institutions in explaining the variation in social trust and social capital among countries.

**Ecological Consequences of the Second Indochina War**-Institut international de recherche sur la paix 1976

**Once Upon A Virus**-Diane Goldstein 2004-08 Once Upon a Virus explores how contemporary, or ""urban,"" legends are indicators of culturally complex attitudes toward health and illness. Tracing the rich tradition of AIDS legends in relation to current scholarship on belief, Diane Goldstein shows how such stories not only articulate widespread perceptions of risk, health care, and health policy, they also influence official and scientific approaches to the disease and its management. Notions that appear in narratives of who gets AIDS, how and why, are indicators of broad issues involving health beliefs, concerns, and needs.

**Handbook on Political Trust**-Sonja Zmerli 2017-01-27 Political trust - in government, parliament, or political parties - has taken centre stage in political science for more than half a century, reflecting ongoing concerns with the legitimacy and functioning of representative democracy. To provide scholars, students and policy makers with a tool to navigate through the complexity of causes and consequences of political trust, this Handbook offers an excellent overview of the conceptual, theoretical, methodological and empirical state of the art, complemented by accounts of regional particularities, and authored by international experts in this field.

**Closer to the Masses**-Matthew E. LENOE 2009-06-30 In this provocative book, Matthew Lenoe traces the origins of Stalinist mass culture to newspaper journalism in the late 1920s. In examining the transformation of Soviet newspapers during the New Economic Policy and the First Five Year Plan, Lenoe tells a dramatic story of purges, political intrigues, and social upheaval. Under pressure from the party leadership to mobilize society for the monumental task of industrialization, journalists shaped a master narrative for Soviet history and helped create a Bolshevik identity for millions of new communists. Everyday labor became an epic battle to modernize the USSR, a fight not only against imperialists from outside, but against shirkers and saboteurs within. Soviet newspapermen mobilized party activists by providing them with an identity as warrior heroes battling for socialism. Yet within the framework of propaganda directives, the rank-and-file journalists improvised in ways that ultimately contributed to the creation of a culture. The images and metaphors crafted by Soviet journalists became the core of Stalinist culture in the mid-1930s, and influenced the development of socialist realism. Deeply researched and lucidly written, this book is a major contribution to the literature on Soviet culture and society.

**Political Equality**-Charles R. Beitz 1989 The description for this book, Political Equality: An Essay in Democratic Theory, will be forthcoming.

**Thank You, Comrade Stalin!**-Jeffrey Brooks 2001 Drawing from research into the most influential Russian newspapers, this book explores the nature, origins, and effects of the idealization of the state, Communist Party, and leader in the Soviet Union between the Revolution and the Cold War.

**Democratic Deficit**-Pippa Norris 2011-02-14 Many fear that democracies are suffering from a legitimacy crisis. This book focuses on 'democratic deficits', reflecting how far the perceived democratic performance of any state diverges from public expectations. Pippa Norris examines the symptoms by comparing system support in more than fifty societies worldwide, challenging the pervasive claim that most established democracies have experienced a steadily rising tide of political disaffection during the third-wave era. The book diagnoses the reasons behind the democratic deficit, including demand (rising public aspirations for democracy), information (negative news about government) and supply (the performance and structure of democratic regimes). Finally, Norris examines the consequences for active citizenship, for governance and, ultimately, for democratization. This book provides fresh insights into major issues at the heart of comparative politics, public opinion, political culture, political behavior, democratic governance, political psychology, political communications, public policymaking,

comparative sociology, cross-national survey analysis and the dynamics of the democratization process.

**Citizens and the State**-Hans-Dieter Klingemann 1995-11-23 Fears that representative democracy in western Europe is in crisis are examined on the basis of trends in mass attitudes over the past two or three decades. The evidence suggests not crisis but a changing relationship between citizens and the state. This change poses a democratic transformation in the countries of Western Europe. Series Description This set of five volumes is an exhaustive study of beliefs in government in post-war Europe. Based upon an extensive collection of survey evidence, the results challenge widely argued theories of mass opinion, and much scholarly writing about citizen attitudes towards government and politics. The series arises from a research project sponsored by the European Science Foundation Series ISBN: 0-19-961880-1

**Fatal Light**-Richard Currey 2009-04-01 A devastating portrait of war in all its horror, brutality, and mindlessness, this extraordinary novel is written in beautifully cadenced prose. A combat medic in Vietnam faces the chaos of war, set against the tranquil scenes of family life back home in small-town America. This young man's rite of passage is traced through jungle combat to malaria-induced fever visions to the purgatory of life in military-occupied Saigon. After returning home from war to stay with his grandfather, he confronts his own shattered personal history and the mysterious human capacity for renewal.

**Travels Through Sweden, Norway, and Finmark**-Arthur de Capell Broke 1823

**Economic Voting**-Han Dorussen 2003-09-02 Economic voting is a phenomenon that political scientists and economists can hardly overlook. There is ample evidence for a strong link between economic conditions and government popularity. However, not everything is that simple and this edited collection focuses on 'the comparative puzzle' of economic voting. Economic Voting emphasises the importance of comparative research design and argues that the psychology of the economic voter model needs to be developed further.

**The Affirmative Action Empire**-Terry Martin 2017-01-17 The Soviet Union was the first of Europe's multiethnic states to confront the rising tide of nationalism by systematically promoting the national consciousness of its ethnic minorities and establishing for them many of the institutional forms characteristic of the modern nation-state. In the 1920s, the Bolshevik government, seeking to defuse nationalist sentiment, created tens of thousands of national territories. It trained new national leaders, established national languages, and financed the production of national-language cultural products. This was a massive and fascinating historical experiment in governing a multiethnic state. Terry Martin provides a comprehensive survey and interpretation, based on newly available archival sources, of the Soviet management of the nationalities question. He traces the conflicts and tensions created by the geographic definition of national territories, the establishment of dozens of official national languages, and the world's first mass "affirmative action" programs. Martin examines the contradictions inherent in the Soviet nationality policy, which sought simultaneously to foster the growth of national consciousness among its minority populations while dictating the exact content of their cultures; to sponsor national liberation movements in neighboring countries, while eliminating all foreign influence on the Soviet Union's many diaspora nationalities. Martin explores the political logic of Stalin's policies as he responded to a perceived threat to Soviet unity in the 1930s by re-establishing the Russians as the state's leading nationality and deporting numerous "enemy nations."
