and celebrate their 'Frog Olympics'. The rhyming text is brilliant to read out loud at home or in the classroom. Great for discussion starters about the Olympics and to talk about inclusion and how people, or frogs, of every size and ability can take part in the Olympics. Humorously illustrated by Amy Husband, the frogs will really leap off the page.

Twin Ambitions - My Autobiography-Mo Farah 2014-04-01 A powerful and gripping human story of the 2012 London Olympics hero On August 4, 2012, Mo Farah braved the pain and punishment to seize Olympic gold in the 10,000m—and in the process went from being a talented athlete to a UK national treasure. Seven days later, Mo seized his second gold at the 5000m to go where no British distance runner

had gone before. Records have tumbled before him: European track records at 1500m, 5000m indoors, and 10,000m; British track records at 5000m, 3000m indoors, and 10k on the road have all fallen to Mohamed "Mo" Farah: the boy from Somalia who came to Britain at the age of eight, leaving behind his twin brother, with just a few words of English, and a natural talent for running. His secondary school PE teacher Alan Watkinson spotted his potential and began easing this human gazelle towards the racetrack. In 2001 Mo showed his promise by winning the 5000m at the European Junior Championships. Soon he was smashing a string of British and European records. He began living with a group of elite Kenyan runners, following their strict regime of run, sleep, eat, and rest. After a disappointing Olympics in Beijing Mo took the bold decision to relocate to Portland, Oregon to work under legendary coach Alberto Salazar. The results were emphatic as Mo took silver at the 10,000m and then raced to gold in the 5000m at the 2011 World Championships in Daegu. Even better would soon follow at London 2012. Twin

Ambitions is much more than an autobiography by a great Olympic champion. It's a moving human story of a man who grew up in difficult circumstances, separated from his family at an early age, who struggled to overcome seemingly insurmountable obstacles and realize his dream.

Ready, Set, Grow!-Lynda Madaras 2009-08-18
Ready, Set, Grow! Young girls before the onset of puberty have a curiosity about their soon-to-be changing bodies that needs addressing in a simpler way than for their older sisters. In Madaras's proven, trust-worthy, friendly voice and style, this entirely new book now brings them the same kind of thoughtful, down-to-earth information—but at a reading and comprehension level that's just right for them. Responding throughout to real life questions and observations from younger girls, Madara explores the changes that are happening, or about to happen, to them, including: the development of breasts, body hair, and body fat; the changes in their reproductive organs, both inside and

out; their first period and all the complex feelings surrounding it; the unwelcome appearance of acne and new body odors; and, perhaps most important, how to respect and celebrate their unique bodies, even when the outside world is not always so accepting. Lively cartoon drawings throughout make the book not only helpful, but fun to read, too.

Steady State Capital Theory-C.C. v.

Weizsäcker 2012-12-06 The following lecture notes were written shortly after I gave a course on capital theory in the winter-semester 1970/71 at the University of Heidelberg. While the general line of the argument is similar to the one in the course, I have modified and added a large number of specific points in the process of writing the English version. I should like to emphasize the narrow limitations of the material covered in these notes. I have completely concentrated on steady states of stationary and exponentially growing economies, even up to the point where there is the danger of misleading the reader. I have done this for several reasons. Other activities have not left me with a sufficient amount of time to be able to find the unifying principle of analysis and mode of presentation for the dynamic aspects of capital theory which would have made it worthwhile to add a sizeable book to the large body of literature in this field. On the other hand over the last couple of years I

have become increasingly aware that some of the results in steady state capital theory (which could be derived without too much mathematical effort) are of relevance in present day discussions about the political role of economic theory and the relative merits of orthodox and radical economics. Also these results seemed not to be known by most of the participants in these discussions.

factors that determine what schools they attend. By digging into the data, economist Nathan Grawe has created probability models for predicting college attendance. What he sees are alarming events on the horizon that every college and university needs to understand. Overall, he spots demographic patterns that are tilting the US population toward the Hispanic southwest. Moreover, since 2007, fertility rates have fallen by 12 percent. Higher education analysts recognize the destabilizing potential of these trends. However, existing work fails to adjust headcounts for college attendance probabilities and makes no systematic attempt to distinguish demand by institution type. This book analyzes demand forecasts by institution type and rank, disaggregating by demographic groups. Its findings often contradict the dominant narrative: while many schools face painful contractions, demand for elite schools is expected to grow by 15+ percent. Geographic and racial profiles will shift only slightly--and attendance by Asians, not Hispanics, will grow most. Grawe also use the model to consider possible changes in

institutional recruitment strategies and government policies. These "what if" analyses show that even aggressive innovation is unlikely to overcome trends toward larger gaps across racial, family income, and parent education groups. Aimed at administrators and trustees with responsibility for decisions ranging from admissions to student support to tenure practices to facilities construction, this book offers data to inform decision-making--decisions that will determine institutional success in meeting demographic challenges"--

Political Entrepreneurship-Josef Lentsch

2018-11-20 This book demonstrates how political entrepreneurs - entrepreneurially minded citizens who launch innovative political start-ups - can drive political change. Building on unique insights, rich examples and personal stories of centrist political entrepreneurs distilled from 40 in-depth interviews, the author guides readers through key stages of political entrepreneurship, and shows how to master them. By equally highlighting successes and failures, the book reveals how political entrepreneurs actually go

about producing transformative political change. In light of the populist challenge and the decline of traditional political parties, the book also offers an entertaining backstage view and first-hand insights into the successes of *En Marche* in France, *Ciudadanos* in Spain, *NEOS* in Austria and other centrist political startups. It provides practical advice on how to learn from and replicate their successes. Political practitioners and other politically interested readers will find a useful theory of Political Entrepreneurship - what it is, how it works, and what its role is in 21st century democracies. Most of all, they will find essential, reproducible tools and methods. "You have read a lot about startups in business, but if you want to know how Silicon Valley style startups look in politics, read this. Its author is not only writing about political entrepreneurs, he is one of them." Ivan Krastev (Chairman of the Centre for Liberal Strategies in Sofia, and permanent Fellow at the Institute of Human Sciences in Vienna) "No one understands better what it takes to take a political start up from ideation to the parliament than Josef Lentsch. Multiple Multisensory Rooms: Myth Busting the Magic-Joanna Grace 2019-09-30

Multisensory rooms are widely used across the country in schools, care settings, hospitals and homes. Even settings such as football stadiums and airports are installing multisensory environments. Nevertheless, a significant lack of effective research has led to a sense of unease around sensory rooms. This crucial book explores the use of multisensory rooms in order to ease that anxiety; taking the mystery out of multisensory rooms, and supporting the reader to reflect and make the most out of their space. Key features include: Guidance on creating sensory spaces on any budget, to suit any level of need. An overview of the history of multisensory rooms, and a detailed exploration of the actual way in which the rooms are used today. A framework for evaluating existing practices and equipment, in order to maximise the potential of the room. A focus on the practitioner as the most important piece of 'equipment' in any sensory room.

Written by a leading sensory specialist in a fully

accessible way, this book is an invaluable tool for anybody who uses, or is considering using, a multisensory room.

Introduction to Modern Economic Growth-

Daron Acemoglu 2008-12-15 Introduction to Modern Economic Growth is a groundbreaking text from one of today's leading economists. Daron Acemoglu gives graduate students not only the tools to analyze growth and related macroeconomic problems, but also the broad perspective needed to apply those tools to the big-picture questions of growth and divergence. And he introduces the economic and mathematical foundations of modern growth theory and macroeconomics in a rigorous but easy to follow manner. After covering the necessary background on dynamic general equilibrium and dynamic optimization, the book presents the basic workhorse models of growth and takes students to the frontier areas of growth theory, including models of human capital, endogenous technological change,

technology transfer, international trade, economic development, and political economy. The book integrates these theories with data and shows how theoretical approaches can lead to better perspectives on the fundamental causes of economic growth and the wealth of nations. Innovative and authoritative, this book is likely to shape how economic growth is taught and learned for years to come. Introduces all the foundations for understanding economic growth and dynamic macroeconomic analysis Focuses on the big-picture questions of economic growth Provides mathematical foundations Presents dynamic general equilibrium Covers models such as basic Solow, neoclassical growth, and overlapping generations, as well as models of endogenous technology and international linkages Addresses frontier research areas such as international linkages, international trade, political economy, and economic development and structural change An accompanying Student Solutions Manual containing the answers to selected exercises is available (978-0-691-14163-3/\$24.95). Edible Insects-Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a

promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Dead Aid-Dambisa Moyo 2010-03-02 A national bestseller, Dead Aid unflinchingly confronts one of the greatest myths of our time: that billions of dollars in aid sent from wealthy countries to developing African nations has helped to reduce poverty and increase growth. In fact, poverty levels continue to escalate and growth rates have steadily declined--and millions continue to suffer. Debunking the current model of international aid promoted by both Hollywood celebrities and policy makers, Dambisa Moyo offers a bold new road map for financing development of the world's poorest countries. Much debated in the United States and the United Kingdom on publication, Dead Aid is an unsettling yet

Everything I Left Unsaid-M. O'Keefe
2015-10-13 Fans of Jodi Ellen Malpas, K. Bromberg, and Joanna Wylde will be unable to resist this sexy, deeply intimate tale of a woman running from her past, and the darkly mysterious man who sets her free. I didn't think answering someone else's cellphone would change my life. But the stranger with the low, deep voice on the other end of the line tempted me, awakened my body, set me on fire. He was looking for someone else. Instead he found me. And I found a hot, secret world where I felt alive for the first time. His name was Dylan, and, strangely, he made me feel safe. Desired. Compelled. Every dark thing he asked me to do, I did. Without question. I longed to meet him, but we were both keeping

secrets. And mine were dangerous. If I took the first step, if I got closer to Dylan—emotionally, physically—then I wouldn't be hiding anymore. I would be exposed, with nothing left to surrender but the truth. And my truth could hurt us both. Praise for *Everything I Left Unsaid* “Exquisite, thrilling, and toe-curlingly sensual . . . a delicious guilty pleasure I never wanted to end!”—New York Times bestselling author Katy Evans “I am head over heels in love with *Everything I Left Unsaid* by M. Max the Champion-Sean Stockdale 2014-05-01
Max is mad about sport. As he gets up, has breakfast and heads off to school, he is dreaming of competing in world class sporting events. In his real day, he and his class win the school football match and, in his imagination, he and his friends are winning the World Cup. This is a lively and fun approach to sport, and a very inclusive picture book showing disabled children and children without disabilities enjoying different sports together in a natural way. The sports include football, rugby, athletics, cricket, diving, discus throwing and cycling.
