available materials such as paper, sand, or soil to complete projects. Plus, clear step-by-step instructions and photos show you what to do every step of the way. Wherever you are in the world, use whatever's at your doorstep and get the whole family exploring nature together. Or encourage your child to observe and interact with nature on their own with RSPB 365 Outdoor Activities You Have To Try!

365 Days Wild-Lucy McRobert 2019-05-16 365 inspirational suggestions for enjoying nature. These 'Random Acts of Wildness' will encourage you to fall in love with, learn about or even help wildlife and wild places near you.

Ben Nicholson-Peter Khoroché 2008 Though it gives an account of his entire career, this book, now available in paperback, is the first to focus on the works of Ben Nicholson's artistic maturity - the drawings and painted reliefs made between 1950 and 1975. Together with the white reliefs of

1934-9, these are the works by which he himself wished to be judged.

SUSE Linux Toolbox-Christopher Negus 2008-01-07 In this handy, compact guide, you'll explore a ton of powerful SUSE Linux commands while you learn to use SUSE Linux as the experts do: from the command line. Try out more than 1,000 commands to find and get software, monitor system health and security, and access network resources. Then, apply the skills you learn from this book to use and administer desktops and servers running openSUSE and SUSE Linux Enterprise or any other Linux distribution.

RSPB Nature Guide: Birds-Catherine Brereton 2020-03-05 Do you know that cormorants are expert fishers? They swim along the water and then quickly dive to catch their prey! Or that great crested grebes fluff up their feathers and break out into a dance to attract their mates?

From the easy-to-spot, year-round tufted duck to the summer visitor and cackling fulmar, get ready to find out about 137 different birds. There are so many feathered friends to meet in this children's spotter's field guide, published in collaboration with the RSPB, the largest wildlife conservation charity in Europe. You will learn where to find birds, what different bird habitats look like and which birds to look out for throughout different seasons. Including our favourite birds, such as the goldfinch, robin, blue tit, blackbird and even owl, as well as some less common visitors we might not know of, each page contains information boxes about each bird. With beautiful illustrations by Kate McLelland throughout, this is the perfect contemporary pocket guide for young birdwatchers in-the-making and adult nature enthusiasts alike.

2019 Nature Month-By-Month-Anna Wilson
2018-10

RSPB Spotlight Owls-Marianne Taylor
2017-08-01 In RSPB Spotlight: Owls Marianne Taylor introduces readers to every aspect of their lives including their physiology, biology and behavior, as well as their history, and future in conservation in Britain and abroad.

The Ecology Book-DK 2019-04-04 How do species interact with each other and their environment? What is biodiversity and can we afford to damage it? As our influence on the planet grows, answering these questions is becoming more pressing. Written in plain English, this book delivers short, pithy explanations of more than 90 key ideas. Step-by-step diagrams untangle tricky theories, illuminating quotes make the ideas and discoveries memorable, and witty illustrations enhance and play with our understanding of the science. You'll explore key theories, movements, and events in biology, geology, geography, and environmentalism, from the ideas of classical thinkers and Enlightenment attempts to impose

order on nature, to discoveries such as DNA and theories like the Gaia hypothesis. Boxes highlighting "green" issues - the impact of pesticides, the plight of vulnerable species, and the search for renewable energy - appear throughout, as do profiles of influential figures - Charles Darwin, Carl Linnaeus, Rachel Carson, and James Lovelock - which place their ideas in their historical context. Whether you're new to ecology, a science student, or simply concerned about what's happening to our planet, this is a comprehensive introduction to the environment and climate change - arguably the most important subjects of our time.

Great Things to Do Outside-Jamie Ambrose 2014-02-17 Illustrated instructions for 365 outdoor activities for young people to discover, observe, explore, and create.

Our Garden Birds-Matt Sewell 2012-06-19 In this beautiful, collectible new volume, street

artist Matt Sewell offers his own unique take on 52 of our favourite British garden birds. Since its first appearance in July 2009, Matt's 'Bird of the Week' feature for the Caught by the River website has quickly become a cult hit. His pop-art watercolours are distinctive and enchanting, as are his innovative descriptions, which see great tits 'bossing the other birds around', the 'playful yet shy buoyancy' of bullfinches and the 'improbable' nature of the waxwing ('like a computer-generated samurai finch'). With 52 birds, one for each week of the year, this delightful gift book will appeal to bird watching enthusiasts, children and adults, and art and illustration fans alike.

Bill Bailey's Remarkable Guide to British Birds-Bill Bailey 2019-05-21 A humorous and very personal guide written by Bill Bailey about his favourite British birds, complete with drawings, notes and cartoons by the comedian himself. 'When herons are spooked they have a habit of vomiting as a defence. Half-digested

pieces of eel and water vole skull on your head is not a good look. Just so you know.' Bill Bailey's wonderfully charming and informative book on the birds he loves is now available as a handy, easy-to-carry pocket paperback. Packed with the comedian's observations, illustrations and sketches, this edition is perfect for birdwatching expeditions, with new information for proper twitchers, including:

- A 'British Birds' checklist
- A list of the best birdwatching sites in the UK
- Suggestions of bird spotting equipment
- Information about joining a birdwatching club

Bailey takes us on a journey around the British Isles, zooming in on those birds that enthuse him the most. Whether it's what they eat, where they fly to or how they communicate, these birds are always fascinating, and he introduces us to their weird and wonderful ways in a manner that is always entertaining. If you're a parent who'd like to appear a bit clever when your child asks you the name of a bird; if you want to find a new and healthy hobby that takes you outdoors; or whether, quite simply, you want to understand a bit more about our natural environment and have

a laugh at the same time, this is the companion book to have. Funny and insightful, and positively crackling with energy, knowledge and wit, this beautiful paperback will delight Bailey's fans, birds as well as those who fancy a bit of armchair escapism. Alongside music and stand-up, one of Bailey's favourite pastimes is birdwatching, which he has been doing since he was a child in the West Country. His fondest memories are of family outings with parents, grandparents and cousins, ticking the birds off in his little Observer's Book of Birds. As he has said about those formative years, 'birdwatching gave a purpose to the day and a love of the natural world which has carried on into my adult life'.

RSPB Spotlight: Robins-Marianne Taylor
2019-07-16 Our most iconic bird, the Robin, is one of the most characterful and familiar of all our garden visitors. Their melodious voices, bright red breasts and cheeky attitudes always endear them to us, but how much do we really know about them? Despite their cute

*Downloaded from
politecnica.universidadeuropea.es on

appearance, Robins are aggressively territorial and hold their territories all year. Their year-round presence has helped them become a beloved and instantly recognisable species. Now, in this delightful new book, Marianne Taylor provides a revealing account of their life cycle, behaviour and breeding, what they eat and how they hold their territories, and she looks into the many cultural representations of these much-loved little birds. The Spotlight series introduces readers to the lives and behaviour of our favourite animals with eye-catching colour photography and informative expert text.

British Birds- 1840

Humble by Nature-Kate Humble 2013-04-25 In 2007, after twenty years of living in London, Kate Humble and her husband Ludo decided it was time to leave city life behind them. Three years later, now the owner of a Welsh smallholding, Kate hears that a nearby farm is to be broken up

and sold off. Another farm lost; another opportunity for a young farmless farmer gone. Desperate to stop the sale, Kate contacts the council with an alternative plan - to keep the farm working and to run a rural skills and animal husbandry school alongside it. Against all odds, she succeeds. Here, in *Humble By Nature*, Kate shares with us a highly personal account of her journey from London town house to Welsh farm. Along the way we meet Bertie and Lawrence the donkeys, Myfanwy and Blackberry the pigs and goats Biscuit and Honey, not forgetting a dog called Badger and his unladylike sidekick Bella. And we are introduced to the tenant farmers Tim and Sarah, the locals who helped and some who didn't, and a whole host of newborn lambs. Full of the warmth and passion for the natural world that makes Kate such a sought after presenter, *Humble By Nature* is the story of two people prepared to follow their hearts and save a small part of Britain's farming heritage, whatever the consequences.

The Book of Pebbles-Christopher Stocks
2020-04-02 Why do we pick up pebbles on the beach? What is it we see in them, and why do we take them home to display on our shelves? Is it their inherent beauty, their infinite variation, or simply their associations with a happy time and place? In this book - part social history and part practical guide - writer and pebble collector Christopher Stocks unearths the sometimes surprising story of our love-affair with pebbles, and considers how the way we see them today has been influenced over the years by artists, authors and even archaeologists. Printmaker Angie Lewin is widely admired for her alluringly stylish images of the natural world. She celebrates the experience of walking and sketching along the British coastline, often incorporating pebbles in her limited edition prints and paintings. Many of these feature in the book alongside a series of new images.

Making Sense of Nature-Noel Castree
2013-08-15 We listen to a cacophony of voices

instructing us how to think and feel about nature, including our own bodies. The news media, wildlife documentaries, science magazines, and environmental NGOs are among those clamouring for our attention. But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts, sentiments and activities to be unduly governed by others? Making Sense of Nature shows that what we call 'nature' is made sense of for us in ways that make it central to social order, social change and social dissent. By utilising insights and extended examples from anthropology, cultural studies, human geography, philosophy, politics, sociology, science studies, this interdisciplinary text asks whether we can better make sense of nature for ourselves, and thus participate more meaningfully in momentous decisions about the future of life - human and non-human - on the planet. This book shows how 'nature' can be made sense of without presuming its naturalness. The challenge is not so much to rid ourselves of the idea of nature and its 'collateral concepts'

Downloaded from
politecnica.universidadeuropea.es on
June 17, 2021 by guest

(such as genes) but instead, we need to be more alert to how, why and with what effects ideas about 'nature' get fashioned and deployed in specific situations. Among other things, the book deals with science and scientists, the mass media and journalists, ecotourism, literature and cinema, environmentalists, advertising and big business. This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context, as well as study tasks, a glossary and suggested further reading. The case studies cover a range of topics, range from forestry in Canada and Guinea, to bestiality in Washington State, to how human genetics is reported in Western newspapers, to participatory science experiments in the UK. Making Sense of Nature will empower readers from a wide range of fields across the social sciences, humanities and physical sciences.

Adventure Tourism-Colin Beard 2012-05-16
Looking at the past, present and future of adventure tourism, Adventure Tourism: the new

frontier examines the product, the adventure tourist profile, and issues such as supply, geography and sustainability. International case studies are used to illustrate these issues, including: Gorilla watching holidays, Trekking on Mount Everest, Diving holidays, and Outward Bound packages. Analysis of the development and nature of adventure tourism accompanies these studies, ensuring that the title is useful both for undergraduate and postgraduate students of tourism and for professionals involved in managing adventure tourism enterprises. There is also a companion website with additional cases, which can be found at www.bh.com/companions/0750651865.

RSPB the Incredible Book of Fantastic Fascinating Nature-Andy Seed 2018-07-12 This laugh-out-loud book is bursting with facts, lists, jokes and funny stories all about nature! Fascinating Nature published in partnership with the RSPB. Which fish can walk on land and climb trees' Ever wondered what makes a tiger walk backwards' How much poo comes out of an elephant's bottom' Where does chocolate come from and what are nature's oddest fungi' Discover answers to these and much more in this amazing book of weird nature! This funny and fascinating book is also bursting with brilliant games and quizzes and hilarious artwork from Scott Garrett. An unmissable book for nature lovers!

It's Complicated-Danah Boyd 2014-02-25
Surveys the online social habits of American teens and analyzes the role technology and social media plays in their lives, examining common misconceptions about such topics as identity, privacy, danger, and bullying.

Walks in Silverdale and Arnside-Brian Evans
2012-02-15 A walking guide to the Silverdale and

Arnside Area of Outstanding Natural Beauty (AONB), at the top of Morecambe Bay in Cumbria and Lancashire, overlooking the Lake District. 21 day walks are described between Carnforth, Holme, Milnthorpe and Arnside, climbing wooded hills and limestone escarpments with views of the Lake District fells. Walks are between 2 and 8 miles in length and visit nature reserves including Leighton Moss RSPB reserve, follow the canal and explore the shoreline. Summits include Wharton Crag, Arnside Knott, Farleton Knott and Hutton Roof Crags. The combinations of rocky coastal scenery, woodland and rough limestone hills either side of the M6 in north Lancashire, make this a paradise for walkers. Routes can easily be linked into longer walks and the extensive network of well walked paths enables walks to be shortened or lengthened at will. The area is renowned for its flora and fauna, its historic buildings and interesting geological features.

Bird, Bee & Bug Houses-Derek Jones 2010

Downloaded from
politecnica.universidadeuropea.es on
June 17, 2021 by guest

Transform any garden into a wildlife haven by creating perfect nesting places for birds, bats, bees, butterflies, lacewings, and ladybugs. All that's needed are a few basic woodworking techniques, tools, and materials (some recycled or scavenged) to complete these 18 projects. Every project comes with an exploded diagram and cutting list, and there's information on choosing locations, maintenance, species habits, and nesting requirements.

RSPB Nature Guide: Wildlife-Catherine Brereton 2021-03-01 Do you know that rabbits eat their own poo? That butterflies taste with their feet? Or that starfish aren't actually fish? This trusty companion guide uncovers all the mysteries of the extraordinary wildlife that surrounds us. From gorgeous foxgloves and strong oaks to wild foxes and slow snails, get ready to find out over 195 different animals, plants and other wildlife. There are so many wonderful living things to meet in this children's spotter's field guide, published in collaboration

with the RSPB, the largest wildlife conservation charity in Europe. You will learn what a butterfly's lifecycle looks like, what pretty flowers grow commonly in gardens and which mushrooms are best to steer clear from ... they may be poisonous! This guide covers all grounds when it comes to nature. Whether you're in a city park or on a walk in the woods, don't ever leave your RSPB Nature Guide: Wildlife at home! With beautiful illustrations by Kate McLelland throughout, this is the perfect contemporary pocket guide for young wildlife watchers in-the-making and adult nature enthusiasts alike.

Swifts in a Tower-David Lack 2018-03 First published in 1956, Swifts in a Tower still offers astonishing insights into the private lives of swifts, their lifestyles, and the environment they inhabit. Now more than sixty years later, swifts have been studied even more thoroughly, using technology unimaginable in the 1950s. This research has revealed more secrets of these indomitable flyers, which spend virtually their

Harrap's Wild Flowers-Simon Harrap
2020-09-22 Wild flower identification may seem impossibly hard to those not familiar with them, but this brilliant new photographic guide aims to change that forever. With superb photography throughout, including stunning portraits and close-ups of key features where relevant, and succinct, no-nonsense text this book will help you identify almost any wild flower that you may encounter in Britain and Ireland. More than 800 carefully selected species are included in the book, and only extreme rarities or seldom seen species are excluded. The pages have been designed to ensure that the photographs are reproduced at a sensible size and that the text is readable. Key features are highlighted in tinted boxes throughout the book, and details of confusion species and look-alikes are given where relevant. Accurate colour maps based on the national plant-mapping scheme are provided for almost every species. This handy guide is an essential tool for anyone interested in our wild

flowers.

Time to Fly-Jim Flegg 2004 There are millions of birds on the move to, from and through Britain and Ireland in every month of the year. This work captures the magic of migration among the birds in seven familiar habitats. It investigates when, why and how this frenetic activity takes place and the hazards that migrants may encounter on their often prodigious travels.

Bird Species-Dieter Thomas Tietze 2018-11-19 The average person can name more bird species than they think, but do we really know what a bird “species” is? This open access book takes up several fascinating aspects of bird life to elucidate this basic concept in biology. From genetic and physiological basics to the phenomena of bird song and bird migration, it analyzes various interactions of birds – with their environment and other birds. Lastly, it shows imminent threats to birds in the Anthropocene,

the era of global human impact. Although it seemed to be easy to define bird species, the advent of modern methods has challenged species definition and led to a multidisciplinary approach to classifying birds. One outstanding new toolbox comes with the more and more reasonably priced acquisition of whole-genome sequences that allow causative analyses of how bird species diversify. Speciation has reached a final stage when daughter species are reproductively isolated, but this stage is not easily detectable from the phenotype we observe. Culturally transmitted traits such as bird song seem to speed up speciation processes, while another behavioral trait, migration, helps birds to find food resources, and also coincides with higher chances of reaching new, inhabitable areas. In general, distribution is a major key to understanding speciation in birds. Examples of ecological speciation can be found in birds, and the constant interaction of birds with their biotic environment also contributes to evolutionary changes. In the Anthropocene, birds are confronted with rapid changes that are highly

threatening for some species. Climate change forces birds to move their ranges, but may also disrupt well-established interactions between climate, vegetation, and food sources. This book brings together various disciplines involved in observing bird species come into existence, modify, and vanish. It is a rich resource for bird enthusiasts who want to understand various processes at the cutting edge of current research in more detail. At the same time it offers students the opportunity to see primarily unconnected, but booming big-data approaches such as genomics and biogeography meet in a topic of broad interest. Lastly, the book enables conservationists to better understand the uncertainties surrounding “species” as entities of protection.

Conservation Biology in Sub-Saharan Africa-

Richard Primack 2019-09-10 Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa.

Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for

professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

Whose Journeys?- 2003

Rspb What's That Bird?-Dorling Kindersley Publishing Staff 2012-01-19 An indispensable pocket guide that includes full-color photographs and illustrations of more than 150 common birds, and instructs bird watchers how to identify different birds and how to tell them apart.

Managing Environments for Leisure and Recreation-Richard Broadhurst 2002-09-26 Can we balance the needs of the host, the environment and the visitor? Most people live for their leisure, recreation and travel opportunities. *Managing Environments for Leisure and Recreation* seeks to bring together the different strands of thought that inform the management

of settings, for leisure and recreation. The text shows how a positive difference can be made to such activities, by taking a balanced approach in managing for the environment and for people, both now, and into the future. *Managing Environments for Leisure and Recreation* urges managers to balance the need for a systematic approach, with the need for a systemic development of an environmental management ethic. It is highly illustrated with over 50 line drawings and includes many case studies from around the world.

Michael Rosen's Book of Play-Michael Rosen 2020-10

Wild Things to Do with Woodlice-Michael Cox 2010-10 Can't tell a blackbird from a blackberry, a butterfly from a buttercup or a hedgehog from a hedgerow? This action-packed book filled with nature activities, facts and tales will tell you everything you need to know about how to get

stuck into nature. From how to stalk a shrew, make a bee barn, to how to take amazing phone-camera snaps, or construct a woodlouse maze out of Lego, this book is packed full of amazing nature activities for every day of the year. Also find out- Who kept a pocket full of toads, how best to watch woodlouse drinking through their bottoms, who is famous for eating bowls of slug stew, where to find the best live nature webcams and much, much more.

Reptiles & Amphibians-Catherine Herbert Howell 1993 Discusses what reptiles and amphibians are and examines the characteristics and behavior of lizards, snakes, turtles, crocodiles, alligators, frogs, toads, and salamanders.

Algy's Amazing Adventures at Sea-Kaye Umansky 2014 Early Readers are stepping stones from picture books to reading books. A blue Early Reader is perfect for sharing and reading

together. A red Early Reader is the next step on your reading journey. There are lots of things Algy doesn't like. He doesn't like bright colours. He doesn't like birds. But at the top of the list of things he doesn't like is the sea. So when Algy, his best friend Cherry and her little brother Brad discover that the shed at the bottom of the garden is taking them on an ocean adventure, he isn't very pleased. But will the sea turn out to be more fun than Algy always thought it was?
