2014-06-11 As an increasingly significant aspect of primary teaching, Creative Approaches to Teaching Primary RE is the essential companion to help bring creativity to life in the classroom. The text begins with a

Each chapter provides ideas and activities demonstrating how pedagogy and theory can be applied in practice within a school setting. The inclusion of case studies will help you consider how to develop creative approaches in all curriculum areas. This book invites you to ask questions such as: · What is Creative Education? · Why should RE be included in the ever-changing curriculum? · How can I use Religious Education to generate a more creative environment in the classroom?

The Animated Bestiary-Paul Wells 2008-11-28
Cartoonists and animators have given animals human characteristics for so long that audiences are now accustomed to seeing Bugs Bunny singing opera and Mickey Mouse

walking his dog Pluto. The Animated Bestiary critically evaluates the depiction of animals in cartoons and animation more generally. Paul Wells argues that artists use animals to engage with issues that would be more difficult to address directly because of political, religious, or social taboos. Consequently, and principally through anthropomorphism, animation uses animals to play out a performance of gender, sex and sexuality, racial and national traits, and shifting identity, often challenging how we think about ourselves. Wells draws on a wide range of examples, from the original King Kong to Nick Park's Chicken Run to Disney cartoons such as Tarzan, The Jungle Book, and Brother Bear to reflect on people by looking at the ways in which they respond to animals in cartoons and films.

The Animated Film Encyclopedia-Graham Webb 2000 Animated films often bring to mind images of Saturday morning cartoons on television, but at one time, animated films, both long and short, were found mostly on the silver screen as part of the featured program. In 1977, George Lucas even specially requested a cartoon to open Star Wars-"Duck Dodgers and the 24 1/2 Century," featuring Daffy Duck. In its rich history, cinematic animation has developed from silent monochrome images to sound-filled shorts that ran with newsreels and adventure serials-to animation sequences used to enliven commercials or live-action films-and finally to feature films like Fantasia and Cinderella. This encyclopedia covers all English language animation from the crucial first eighty years of its history. From the popular to the obscure, from Bugs to Mickey, from the short to the feature, nearly 7,000 items are covered. Each entry includes production information, date, running time, and a synopsis. Much of the information compiled here is rare. For example, character voices once considered "anonymous" are here identified, and animated films now lost because they were once considered expendable are here given the attention they deserve. A complete index allows multiple points of access.
