History of Benton Harbor and Tales of Village Days -James Pender 1915	
Routledge Companion to Sports History -S. W. Pope 2009-12-17 The field of sports history is no longer a fledgling area of study. There is a great vitality in the field and it has matured dramatically over the past decade. Reflecting changes to traditional approaches, sport historians need now to engage with contemporary debates about history, to be encouraged to position themselves and their methodologies in relation to current epistemological issues, and to promote the importance of reflecting on the literary or poetic dimensions of producing history. These contemporary developments, along with a wealth of international research from a range of theoretical perspectives, provide the backdrop to the new Routledge Companion to Sports History. This book provides a comprehensive guide to the international field of sports history as it has developed as an academic area of study. Readers are guided through the development of the field across a range of thematic and geographical contexts and are introduced to the latest cutting edge approaches within the field. Including contributions from many of the world’s leading sports historians, the Routledge Companion to Sports History is the most important single volume for researchers and students in, and entering, the sports history field. It is an essential guide to contemporary research themes, to new ways of doing sports history, and to the theoretical and methodological foundations of this most fascinating of subjects.	
In the Plex -Steven Levy 2021-02-02 “The most interesting book ever written about Google” (The Washington Post) delivers the inside story behind the most successful and admired technology company of our time, now updated with a new Afterword. Google is arguably the most important company in the world today, with such pervasive influence that its name is a verb. The company founded by two Stanford graduate students—Larry Page and Sergey Brin—has become a tech giant known the world over. Since starting with its search engine, Google has moved into mobile phones, computer operating systems, power utilities, self-driving cars, all while remaining the most powerful company in the advertising business. Granted unprecedented access to the company, Levy disclosed that the key to Google’s success in all these businesses lay in its engineering mindset and adoption of certain internet values such as speed, openness, experimentation, and risk-taking. Levy discloses details behind Google’s relationship with China, including how Brin disagreed with his colleagues on the China strategy—and why its social networking initiative failed; the first time Google tried chasing a successful competitor. He examines Google’s rocky relationship with government regulators, particularly in the EU, and how it has responded when employees left the company for smaller, nimbler start-ups. In the Plex is the “most authoritative...and in many ways the most entertaining” (James Gleick, The New York Book Review) account of Google to date and offers “an instructive primer on how the minds behind the world’s most influential internet company function” (Richard Waters, The Wall Street Journal).	
2020 Lighthouses - 2019-03	
Ida Lupino, Filmmaker -Phillip Sipiora 2020-11-12 Ida Lupino, Filmmaker begins with an exploration of biographical studies and analytical treatments of Lupino's film and television work as director, moving forward to assess Lupino's career in film and television with particular attention given to Lupino's singular, pioneering achievements and her role(s) within the cultural milieu(s) of her time, particularly the representation of women in cinema. Each chapter includes a close analysis of the film or television work with insights drawn from film history and cultural/gender studies to demonstrate that Lupino was a significant directorial figure in the development of film, especially in the late 1940s and early 1950s-and in television extending well into the 1960s. Lupino left her imprint on filmmaking and her canon of film and television work continue to influence Hollywood movie making. The contributors to this volume, including Martin Scorsese, assess Lupino's main strengths as a filmmaker-her treatment of narrative movement, plotting, dialogue, gender roles, and uses of tradition representations of men and women in frames of parody and satire. The collection collectively examines the successes (and failures) of Lupino's directorial career, including focusing on the reasons why she initially proved to be so strategic to the progress of women behind the camera.	
The Creature Chronicles -Tom Weaver, 2017-02-06 He was the final addition to Universal's "royal family" of movie monsters: the Creature from the Black Lagoon. With his scaly armor, razor claws and a face only a mother octopus could love, this Amazon denizen was perhaps the most fearsome beast in the history of Hollywood's Studio of Horrors. But he also possessed a sympathetic quality which elevated him fathoms above the many aquatic monsters who swam in his wake. Everything you ever wanted to know about the Gill Man and his mid-1950s film career (Creature from the Black Lagoon, Revenge of the Creature, The Creature Walks Among Us) is collected in this book, packed to the gills with hour-by-hour production histories, cast bios, analyses, explorations of the music, script-to-screen comparisons, in-depth interviews and an ocean of fin-tastic photos.	
Lions in the Way a Discursive History of the Oslers -Anne Wilkinson 2018-02-07 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.	
The Perfect Thing -Steven Levy 2006-10-23 On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global obsession. The Perfect Thing is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music. Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on "the iPod generation." Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social cachet it lends them, even wondering whether the device itself has its own musical preferences. Steven Levy, the chief technology correspondent for Newsweek magazine and a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store. (We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive qualities of the iPod itself, The Perfect Thing shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. "Shuffle" is a hallmark of the digital age -- and The Perfect Thing, via sharp, insightful reporting, is the perfect guide to the deceptively diminutive gadget embodying our era.	
The Hell-Fire Clubs -Evelyn Lord 2010-01-01 The Hell-Fire Clubs scandalized eighteenth-century English society. Rumors of their orgies, recruitment of prostitutes, extensive libraries of erotica, extreme rituals, and initiation ceremonies circulated widely at the time, only to become more sensational as generations passed. This thoroughly researched book sets aside the exaggerated gossip about the secret Hell-Fire Clubs and brings to light the first accurate portrait of their membership (including John Wilkes, the Chancellor of the Exchequer, and the Prince of Wales), beliefs, activities, and the reasons for their proliferation, first in the British Isles and later in America, possibly under the auspices of Benjamin Franklin. Hell-Fire Clubs operated under a variety of titles, but all attracted similar members—mainly upper-class men with abundant leisure and the desire to shock society. The book explores the social and economic context in which the clubs emerged and flourished; their various phases, which first involved violence as an assertion of masculinity, then religious blasphemy, and later sexual indulgence; and the countermovement that eventually suppressed them. Uncovering the facts behind the Hell-Fire legends, this book also opens a window on the rich contradictions of the Enlightenment period.	
Issues Raised by Human Cloning Research -United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations 2001	
The Complete Films of Vincent Price -Lucy Chase Williams 1995 Provides cast list, plot and information about each individual film, and reviews and quotes from other actors.	
Counterpoint to a City -Robin Elliott 1997 Featuring archival documents, interviews, newspaper reports and reviews, and recent scholarship in the field, this book chronicles the history of the Women's Musical Club of Toronto, which has been sponsoring chamber music and solo recitals for nearly 100 years.	
The Werewolf of Paris -Guy Endore 2012-07-17 Endore’s classic werewolf novel—now back in print for the first time in over forty years—helped define a genre and set a new standard in horror fiction The werewolf is one of the great iconic figures of horror in folklore, legend, film, and literature. And connoisseurs of horror fiction know that The Werewolf of Paris is a cornerstone work, a masterpiece of the genre that deservedly ranks with Mary Shelley’s Frankenstein, Bram Stoker’s Dracula, and Robert Louis Stevenson’s The Strange Case of Dr. Jekyll and Mr. Hyde. Endore’s classic novel has not only withstood the test of time since it was first published in 1933, but it boldly used and portrayed elements of sexual compulsion in ways that had never been seen before, at least not in horror literature. In this gripping work of historical fiction, Endore’s werewolf, an outcast named Bertrand Cailliet, travels across pre-Revolutionary France seeking to calm the beast within. Stunning in its sexual frankness and eerie, fog-enshrouded visions, this novel was decidedly influential for the generations of horror and science fiction authors who came afterward.	
The Unicorn’s Secret -Steven Levy 2016-11-08 The true story of Ira Einhorn, the Philadelphia antiwar crusader, environmental activist, and New Age guru with a murderous dark side. During the cultural shockwaves of the 1960s and ’70s, Ira Einhorn—nicknamed the “Unicorn”—was the leading radical voice for the antiwar movement at the University of Pennsylvania. At his side were such noted activists as Abbie Hoffman and Jerry Rubin. A brilliantly articulate advocate for peace in a turbulent era, he rallied followers toward the growing antiestablishment causes of free love, drugs, and radical ecological reform. In 1979, when the mummified remains of his girlfriend, Holly Maddux, a Bryn Mawr flower child from Tyler, Texas, were found in a trunk in his apartment, Einhorn claimed a CIA frame-up. Incredibly, the network of influential friends, socialites, and powerful politicians he’d charmed and manipulated over the years supported him. Represented by renowned district attorney and future senator Arlen Specter, Einhorn was released on bail. But before trial, he fled the country to an idyllic town in the French wine region and disappeared. It would take more than twenty years—and two trials—to finally bring Einhorn to justice. Based on more than two years of research and 250 interviews, as well as the chilling private journals of Einhorn and Maddux, prize-winning journalist Steven Levy paints an astonishing and complicated	

	
teezel-and-the-christmas-witches	

portrait of a man motivated by both genius and rage. The basis for 1998 NBC television miniseries The Hunt for the Unicorn Killer, The Unicorn’s Secret is a “spellbinding sociological/true crime study,” revealing the dark and tragic dimensions of a man who defined an era, only to shatter its ideals (Publishers Weekly).

Michael Curtiz-Alan K. Rode 2021-02-16 Academy Award–winning director Michael Curtiz (1886–1962) -- whose best-known films include Casablanca (1942), Yankee Doodle Dandy (1942), Mildred Pierce (1945) and White Christmas (1954) -- was in many ways the anti-auteur. During his unprecedented twenty-seven year tenure at Warner Bros., he directed swashbuckling adventures, westerns, musicals, war epics, romances, historical dramas, horror films, tearjerkers, melodramas, comedies, and film noir masterpieces. The director's staggering output of 180 films surpasses that of the legendary John Ford and exceeds the combined total of films directed by George Cukor, Victor Fleming, and Howard Hawks. In the first biography of this colorful, instinctual artist, Alan K. Rode illuminates the life and work of one of the film industry's most complex figures. He begins by exploring the director's early life and career in his native Hungary, revealing how Curtiz shaped the earliest days of silent cinema in Europe as he acted in, produced, and directed scores of films before immigrating to the United States in 1926. In Hollywood, Curtiz earned a reputation for his explosive tantrums, his difficulty communicating in English, and his disregard for the well-being of others. However, few directors elicited more memorable portrayals from their casts, and ten different actors delivered Oscar-nominated performances under his direction. In addition to his study of the director's remarkable legacy, Rode investigates Curtiz's dramatic personal life, discussing his enduring creative partnership with his wife, screenwriter Bess Meredith, as well as his numerous affairs and children born of his extramarital relationships. This meticulously researched biography provides a nuanced understanding of one of the most talented filmmakers of Hollywood's golden age. Paperback edition features a new afterword by the author.

Insanely Great -Steven Levy 2000 The Newsweek technology writer chronicles the rise of the Mac, a machine that revolutionized the computer industry and American society. Original.	
Ib Melchior -Robert Skotak 2000 If you are only interested in reading about old science fiction movies, then this book is not for you. For this book contains a lot of dull stuff about a man who touched the beating heart of another; stepped into the cold of outer space; witnessed the horrors of Dachau; directed some of the first TV shows; called one of the most famous opera singers of the century "father"; became a war hero; was knighted; had himself arrested for drunk driving; worked with laser beams; jumped out of airplanes; "infiltrated" an American city; broke a 400 year-old cipher; wrestled lions; had the fangs of a leopard at his throat; picked up a prostitute; learned how to kill with a pencil; rode an African elephant; sorted 50,000 beetles; stage-managed ice shows; worked with rockets and the Rockettes. A man who was a spy and counterspy, an actor, stage manager, singer, set designer. He speaks six languages; is a novelist and has been a gourmet chef; helped sail a tall ship and... and--incidentally--wrote or directed a bunch of science fiction movies that many of us have enjoyed! Several of which have become both cult movies and earned a respectable place among mainstream viewers. So perhaps you'll want to read this book after all.	
Science Fiction in the Cinema -John Baxter 1970	
CASTING THE RUNES AND OTHER GHOST STORIES -Montague Rhodes James 2002 A spook-tacular collection of ghost stories by one of the masters of the genre, introduced by Pulitzer Prize-winning author Chabon.	
Future Tense -John Brosnan 1978 Covers special effects, plot summaries, and analyses of the greatest and most notorious films, among them "The Thing", Invasion of the Body Snatchers", "The Incredible Shrinking Man", and "Star Wars."	
Incredibly Strange Films -V. Vale 2017-03-14 Incredibly Strange Films is a functional guide to important territory neglected by the film-criticism establishment, spotlighting un hailed directors -- Hershell Gordon Lewis, Russ Meyer, Larry Cohen, Ray Dennis Steckler, Ted V. Mikels and others -- who have been critically consigned to the ghettos of gore and sexploitation films. In-depth interviews focus on philosophy while anecdotes entertain as well as illuminate theory. The guide includes biographies, genre overviews, filmographies, bibliography, quotations, an A-Z of film personalities, lists of recommended films, sources, index, as well as 172 photos.	
Hackers -Steven Levy 2010-05-19 This 25th anniversary edition of Steven Levy's classic book traces the exploits of the computer revolution's original hackers -- those brilliant and eccentric nerds from the late 1950s through the early '80s who took risks, bent the rules, and pushed the world in a radical new direction. With updated material from noteworthy hackers such as Bill Gates, Mark Zuckerberg, Richard Stallman, and Steve Wozniak, Hackers is a fascinating story that begins in early computer research labs and leads to the first home computers. Levy profiles the imaginative brainiacs who found clever and unorthodox solutions to computer engineering problems. They had a shared sense of values, known as "the hacker ethic," that still thrives today. Hackers captures a seminal period in recent history when underground activities blazed a trail for today's digital world, from MIT students finagling access to clunky computer-card machines to the DIY culture that spawned the Altair and the Apple II.	
Little Shoppe of Horrors -Richard Klemensen 2019-02-26 'Little Shoppe of Horrors' #41 in 2018 (now in an 8-1/2"x11" format) takes you inside the production of Hammer Film's 1968 second Cavegirl/Dinosaur movie - "When Danforth Ruled the Earth - the Making of Hammer's Second Dinosaur Epic." Mark Wolf goes in-depth on Jim Danforth's Academy Award (c) nominated stop motion special effects, and the battle to get the film made and distributed. Interviews with stars Victoria Vetri and Robin Hawdon. Plus, Hammer's fated never to be made 'ZEPPELIN v PTERODACTYLS' RAIDERS OF THE STONE RING Takes to the Sky! The famous poster of what might have been has been seen in many Hammer oriented publications. An interview with the lovely Vampire lady - Pauline Peart - from the 1971 THE SATANIC RITES OF DRACULA. Part 2 of our study/history of the seminal Monsterzine, CASTLE OF FRANKENSTEIN, and its unique creator - Calvin T. Beck.	
Meditation Now Or Never -Steve Hagen 2012-07-01 In Meditation Now or Never Steve Hagen, a Zen priest and bestselling author of Buddhism Plain and Simple, provides an accessible and thorough manual on meditation, for both newcomers and experienced practitioners. In the modern world our lives are more frenetic than ever. We live with a burning sense that we have to get something done. But what do we really achieve? And why are we never satisfied? This book is an invitation to switch off, and to enjoy stillness - right now. Steve Hagen offers simple practices that avoid needlessly complicating meditation; highlights where many of us get stuck in meditating - and how to get unstuck; and, above all, focuses on meditation not simply as a spiritual technique, but as a way of living.	
University of Ottawa Review -University Of. University Of Ott Ottawa 2012-08	
The War Trilogy -Roberto Rossellini 1985 Screenplays.	
Whitchurch Township -Jean Barkey 1993 Over 165 important photos, maps and documents illustrate informative chapters on the Whitchurch Township's aboriginal history, development, the formation of its many hamlets, and towns, and it's unique physical geography and archaeology. The township's many churches, schools and officials are thoroughly chronicled in individual appendices. This book will delight and fascinate Whitchurch Township residents, past and present, and Ontario history buffs will discover a wealth of facts and images within its pages.	
On the Six Moral Tales - 2006	

Artificial Life -Steven Levy 1994-05-01 This enthralling book alerts us to nothing less than the existence of new varieties of life. Some of these species can move and eat, see, reproduce, and die. Some behave like birds or ants. One such life form may turn out to be our best weapon in the war against AIDS. What these species have in common is that they exist inside computers, their DNA is digital, and they have come into being not through God's agency but through the efforts of a generation of scientists who seek to create life in silico. But even as it introduces us to these brilliant heretics and unravels the intricacies of their work, Artificial Life examines its subject's dizzying philosophical implications: Is a self-replicating computer program any less alive than a flu virus? Are carbon-and-water-based entities merely part of the continuum of living things? And is it possible that one day "a-life" will look back at human beings and dismiss us as an evolutionary way station -- or, worse still, a dead end? From the Trade Paperback edition.	
Films and Feelings -Raymond Durngat 1971 Raymond Durngat here examines literally hundreds of films in an effort to isolate universals of the language of films and to loft their poetics to an articulate level.	
Beating the Devil -Tony Earnshaw 2005 The film's troublesome production schedule is brought vividly to life through Tony Earnshaw's enthusiastic style - including new research and original interviews. Earnshaw's book tracks the film's development from the original ghost story Casting the Runes by M R James through the various shooting scripts, alternative titles, and the challenging production work, to the final theatrical release. Along the way there are anecdotes, analysis and fascinating insights into British movie making in the 1950s, as well as previously unseen production designs by Sir Ken Adam, who went on to create the gadgets and secret bases that helped make the Bond series an international phenomenon. With a comprehensive location guide and biographies of all the onstage and backstage players, Beating The Devil - the Making of Night of the Demon is the definitive book on what has been described as "The Casablanca of Horror Films".	
Benighted -J. B. Priestley 2013 'Priestley is one of the finest and most popular storytellers of the last hundred years.' - Dame Margaret Drabble 'Abundant life flows through J.B. Priestley's books. He was the last of his kind.' - Stan Barstow J.B. Priestley is one of our literary icons of the 20th century. And it is time that we all became re-acquainted with his genius.' - Dame Judi Dench Philip and Margaret Waverton and their friend Roger Penderel are driving through the mountains of Wales when a torrential downpour washes away the road and forces them to seek shelter for the night. They take refuge in an ancient, crumbling mansion inhabited by the strange and sinister Femm family and their brutish servant Morgan. Determined to make the best of the circumstances, the benighted travellers drink, talk, and play games to pass the time while the storm rages outside. But as the night progresses and tensions rise, dangerous and unexpected secrets emerge. On the house's top floor are two locked doors; behind one of them lies the mysterious, unseen Sir Roderick Femm, and behind the other lurks an unspeakable terror. Which is more deadly: the apocalyptic storm outside the house or the unknown horrors that await within? And will any of them survive the night? "Benighted" (1927), a classic 'old dark house' novel of psychological terror, was the second novel by J. B. Priestley (1894-1984), better known for his classics "The Good Companions" (1929), "Angel Pavement" (1930) and "Bright Day" (1946). The basis for James Whale's 1932 film "The Old Dark House," "Benighted" returns to print for the first time in fifty years. This edition includes the unabridged text of the first British edition, a new introduction by Orrin Grey, and a reproduction of the rare jacket art of the 1927 Heinemann edition.	
Avalon ; Tin Men ; Diner -Barry Levinson 1990 Three screenplays set in Baltimore deal with five friends in the fifties, a rivalry between two aluminum siding salesmen, and an immigrant family adjusting to life in America	
Teletypist -Jack Rudman 1981-06 The Electronic Technician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: arithmetic; knowledge of tools; workplace learning; systems troubleshooting; and more.	
The Rosary -Ethelbert Nevin 1801 A Violin solo with piano accompaniment, composed by Ethelbert Nevin .
