Poverty Traps-Samuel Bowles 2016-05-31 Much popular belief--and public policy--rests on the idea that those born into poverty have it in their power to escape. But the persistence of poverty and ever-growing economic inequality around the world have led many economists to seriously question the model of individual economic self-determination when it comes to the poor. In *Poverty Traps*, Samuel Bowles, Steven Durlauf, Karla Hoff, and the book's other contributors argue that there are many conditions that may trap individuals, groups, and whole economies in intractable poverty. For the first time the editors have brought together the perspectives of economics, economic history, and sociology to assess what we know--and don't know--about such traps. Among the sources of the poverty of nations, the authors assign a primary role to social and political institutions, ranging from corruption to seemingly benign social customs such as kin systems. Many of the institutions that keep nations poor have deep roots in colonial history and persist long after their initial causes are gone. Neighborhood

effects--influences such as networks, role models, and aspirations--can create hard-to-escape pockets of poverty even in rich countries. Similar individuals in dissimilar socioeconomic environments develop different preferences and beliefs that can transmit poverty or affluence from generation to generation. The book presents evidence of harmful neighborhood effects and discusses policies to overcome them, with attention to the uncertainty that exists in evaluating such policies.

The Gender Trap-Emily W. Kane 2012-08-27 "Emily Kane shows clearly that most parents understand children's personality to be some combination of nature and nurture, and many wish they could help nurture their children to escape gender traps. Yet these parents are themselves trapped by the gender structure itself, especially the accountability they feel to other people's expectations, and the fear that if their boys are free to explore activities usually associated with girls they will be punished by the world around them. The author shows clearly that to help parents navigate childrearing, we have to change the world around them. A good read, perfect for the undergraduate classroom, and clear enough even to give to those new parents in your family or the neighborhood."--Cover.

The Trap-Dan Billany 2012-02-14 Dan Billany's *The Trap*, first published in 1950, still stands - in the opinion of M.R.D. Foot - as 'one of the most powerful English novels to come out of the [Second World War].' It echoes the wartime experiences of its author, who is believed to have died in 1943 while on the run from an Italian POW camp, but not before entrusting the manuscripts of *The Trap* to safekeeping. The book's narrator, army lieutenant Michael Carr, tells of his early years in Cornwall, of the girl he met and loved there, and of the hard times her family endured between the wars. These troubles and joys give way to the tragedy of war, and the book's narrative becomes one of comradeship, suspense and fighting in the North African desert. 'The Trap is an outstanding novel by a writer of natural genius... written with great force and honesty... profoundly impressive.' Times Literary Supplement

The Carbon Trap-Randy Dutton 2012-01-26 Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in *The Carbon Trap*, the first book in *The Carbon Series*. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.

Below the Line-Steven Jankowski 2020-11-09 In between gigs as a Hollywood movie Teamster, self-proclaimed sailing bum Mike Millek moonlights as a freelance, armed chauffeur to the stars. When Mike arrives one night to pick up his deadbeat client, rap music producer Pays Lee, at his private jet Mike finds him freshly murdered with a satchel full of cash. Mike makes the critical decision to take what is owed him before reporting anything to the police. More money than he ever expected, this turns out to be Mike's biggest payday in his life, but not without consequences. Opening this Pandora's box not only costs him his best friend's life and leads him down a road of deception with his newly found love Molly, but thrusts them both into a dangerous conspiracy entrenched in the sordid underbelly of the Hollywood power elite. Praise for *BELOW THE LINE*: "If Michael Connolly were an ex-Hollywood agent who knew the cream of show biz and the sour milk of its lowlifes like he knows the back of his brass-knuckled hand, he might have created Mike Millek and his foot-to-the-floor dark ride, *Below the Line*. Set along the seams of the real movie business—as its street-savvy author Jankowski has lived and savored it—with an A-list casting call of characters so real they're scary, Mike Millek is as hardboiled as a shark in hot water and his Los Angeles is a City of Angles. So if you take your java noir with a double shot of espresso, take just one bite of *Below the Line* and it will reel you in...hook, line and sinker!" —Rupert Holmes, multiple Edgar and Tony-winning author, creator of the AMC-TV series *Remember WENN*, and author of *Where the Truth Lies* "Batten down the hatches for a hard-boiled storm. *Below the Line* is an impressive debut, a suspenseful Nautical Noir on the fringe of Hollywood's dream factory. Taut, vivid tough-guy pulp in the tradition of John D. MacDonald and Mickey Spillane." —John Shepphird, Shamus Award-winning author "Babes, boats and betrayal! Steve Jankowski's thrilling debut crime novel jets through the gritty sets of Hollywood to the deadly Pacific in a riveting tale worthy of Travis McGee." —Lawrence Maddox, author of *Fast Bang Booze*

Candid Creatures-Roland Kays 2016-05-29 A riveting collection of photographs capturing wild animals in their native habitats and demonstrating the importance of camera traps. In *Candid Creatures*, the first major book to reveal the secret lives of animals through motion-sensitive game cameras, biologist Roland Kays has assembled over 600 remarkable photographs. Drawing from archives of millions of color and night-vision photographs collected by hundreds of researchers, Kays has selected images that show the unique perspectives of wildlife from throughout the world. Using these photos, he tells the stories of scientific discoveries that camera traps have enabled, such as living proof of species thought to have been extinct and details of predator-prey interactions. Each image captures a moment frozen in the camera's flash as animals move through their wild habitats. Kays also discusses how scientists use camera traps to address conservation issues, creating solutions that allow humans and wild animals to coexist. More than just a collection of amazing animal

pictures, the book's text, maps, and illustrations work together to describe the latest findings in the fast-moving field of wildlife research. *Candid Creatures* is a testament to how the explosion of game cameras around the world has revolutionized the study of animal ecology. The powerful combination of pictures and stories of discovery will fascinate anyone interested in science, nature, wildlife biology, or photography. "Full of fabulous pictures of weird and wonderful creatures . . . [*Candid Creatures* is] loaded with information and carries a strong conservation message." —Conservation Biology

Disney's The Parent Trap-Hallie Marshall 1998 Identical twin sisters raised separately join forces to bring their divorced parents back together.

China's Transformation-Manoranjan Mohanty 2017-10-30 The book provides insights into the economic and social transformation that China has undergone from 1979 to the present. Based on the author's research in China for over three decades, *China's Transformation: The Success Story and the Success Trap* shows how its 'reform and open door' policy evolved and helped achieve tremendous economic success. However, it also generated serious social and environmental problems. The book presents that the consequences of this success story of growth are so strong that it has been difficult for China to change its main development path to achieve a desirable level of equity and sustainability. The author describes this as the 'success trap' that China is currently grappling with. The author argues that China's reform path is grounded in the premises of the European Industrial Revolution backed by strong sociopolitical forces at home, indicating that a major change in the development path is unlikely. However, all indications point to a strong and prosperous China as a rising world power in the coming decades, trying to cope with the sociopolitical problems in its own way.

The Empire Trap-Noel Maurer 2013-08-25 Throughout the twentieth century, the U.S. government willingly deployed power, hard and soft, to protect American investments all around the globe. Why did the United States get into the business of defending its citizens' property rights abroad? *The Empire Trap* looks at how modern U.S. involvement in the empire business began, how American foreign policy became increasingly tied to the sway of private financial interests, and how postwar administrations finally extricated the United States from economic interventionism, even though the government had the will and power to continue. Noel Maurer examines the ways that American investors initially influenced their government to intercede to protect investments in locations

such as Central America and the Caribbean. Costs were small—at least at the outset—but with each incremental step, American policy became increasingly entangled with the goals of those they were backing, making disengagement more difficult. Maurer discusses how, all the way through the 1970s, the United States not only failed to resist pressure to defend American investments, but also remained unsuccessful at altering internal institutions of other countries in order to make property rights secure in the absence of active American involvement. Foreign nations expropriated American investments, but in almost every case the U.S. government's employment of economic sanctions or covert action obtained market value or more in compensation—despite the growing strategic risks. The advent of institutions focusing on international arbitration finally gave the executive branch a credible political excuse not to act. Maurer cautions that these institutions are now under strain and that a collapse might open the empire trap once more. With shrewd and timely analysis, this book considers American patterns of foreign intervention and the nation's changing role as an imperial power.

The Monster Diaries-Luciano Saracino 2013-04-26 The Federation of Fright brings you a sneak peek into the real, everyday lives of the world's scariest monsters! Vibrant illustrations and fun text make this a book that both kids and grown-ups will love.

The Vimy Trap-Ian McKay 2017-03-16 The story of the bloody 1917 Battle of Vimy Ridge is, according to many of today's tellings, a heroic founding moment for Canada. This noble, birth-of-a-nation narrative is regularly applied to the Great War in general. Yet this mythical tale is rather new. "Vimyism"—today's official story of glorious, martial patriotism—contrasts sharply with the complex ways in which veterans, artists, clerics, and even politicians who had supported the war interpreted its meaning over the decades. Was the Great War a futile imperial debacle? A proud, nation-building milestone? Contending Great War memories have helped to shape how later wars were imagined. The Vimy Trap provides a powerful probe of commemoration cultures. This subtle, fast-paced work of public history—combining scholarly insight with sharp-eyed journalism, and based on primary sources and school textbooks, battlefield visits and war art—explains both how and why peace and war remain contested terrain in ever-changing landscapes of Canadian memory.

Integrated Pest Management (IPM)-Harsimran Gill 2016-08-31 This book is an update on environmentally sound pest management practices under the umbrella of integrated pest management (IPM). It consists of seven contributions from different authors providing information on pest management approaches as chemical alternatives. The book chapters detail about historical review of IPM concepts; strategies and some experiences in applications of IPM in Latin America; pest control in organic agricultural system; and the use of entomopathogenic and molluscoparasitic nematodes, insect pheromones, semiochemicals, detergents, and soaps as a part of IPM scheme. The goal of this book is to provide the most up-to-date review on information available around chemical alternatives in IPM. Therefore, this book will equip academia and industry with adequate basic concepts and applications of IPM as eco-friendly pest management option.

The Santa Claus Trap-Jon Furberg 1984

Edible Insects-Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Seven Skills of Media Literacy-W. James Potter 2019-09-10 In Seven Skills of Media Literacy, best-selling author and renowned scholar W. James Potter provides readers with the practical guidance they need to make substantial improvements on seven major skills required to increase their media literacy. Moving Out of Poverty-Deepa Narayan 2009-12-09 There is no peace with hunger. Only promises and promises and no fulfillment. If there is no job, there is no peace. If there is nothing to cook in the pot, there is no peace. - Oscar, a 57-year-old man, El Gorri n, Colombia They want to construct their houses near the road, and they cannot do that if they do not have peace with their enemies. So peace and the road have developed a symbiotic relation. One cannot live without the other. . . . - A community leader from a conflict-affected community on the island of Mindanao, Philippines Most conflict studies focus on the national level, but this volume focuses on the community level. It explores how communities experience and recover from violent conflict, and the surprising opportunities that can emerge for poor people to move out of poverty in these harsh contexts. 'Rising from the Ashes of Conflict' reveals how poor people s mobility is shaped by local democracy, people s associations, aid strategies, and the local economic environment in over 100 communities in seven conflict-affected countries, including Afghanistan. The findings suggest the need to rethink postconflict

development assistance. This is the fourth volume in a series derived from the Moving Out of Poverty study, which explores mobility from the perspectives of poor people in more than 500 communities across 15 countries.

The Fly Trap-Fredrik Sjoberg 2015-06-04 Fredrik Sjöberg finds happiness in the little things. Millions of them, in fact. This beguiling bestseller tells the story of his obsession with collecting hoverflies. It is also a unique meditation on life: living on a remote Swedish island, blissful long summer nights, lost loves, unexpected treasures, art, nature, slowness, and how freedom can come from the things we least expect. I often return to The Fly Trap, it remains close to my heart. The minute observations from nature that reveal sudden insights into one's life.' Tomas Tranströmer 'Charming, witty and original.' Patrick Barkham, Guardian 'Nature writing that can laugh at itself, a real tonic.' Gregory Day, Sydney Morning Herald 'Delightful . . . a humane man of wide-ranging curiosity, Sjöberg writes with infectious passion.' Carl Wilkinson, Financial Times '
