Stories of Your Life and Others-Ted Chiang 2015-06-01 With his masterful first collection, multiple-award-winning author Ted Chiang deftly blends human emotion and scientific rationalism in eight remarkably diverse stories, all told in his trademark precise and evocative prose. From a soaring Babylonian tower that connects a flat Earth with the firmament above, to a world where angelic visitations are a wondrous and terrifying part of everyday life; from a neural modification that eliminates the appeal of physical beauty, to an alien language that challenges our very perception of time and reality. . . Chiang's rigorously imagined fantasia invites us to question our understanding of the universe and our place in it.

Story of Life-Catherine Barr 2018-02 At first, nothing lived on Earth. It was a noisy, hot, scary place. Choking gas exploded from volcanoes and oceans of lava bubbled around the globe... Then in the deep, dark ocean, something amazing happened. This is an exciting and dramatic story about how life began and developed on Planet Earth, written especially for younger children. The authors explain how the first living cell was created, and how the cells multiply and create jellyfish and worms, and then fish with bendy necks, which drag themselves out of the water into swampy forests. They tell the story of the biggest creatures that have ever walked on land - the dinosaurs. Long after that, hairy creatures who have babies, not eggs, take over, stand on two legs and spread around the world, some of them living through cataclysmic events such as ice ages and volcanic eruptions. Everyone living today is related to these survivors. With delightful illustrations including lots of detail and humour, all carefully researched and checked, this book shows the development of life on Earth in a truly accessible and simple way. The Story of Life in 10 1/2 Species-Marianne Taylor 2020-10-20 Souvenirs of the planet: Ten (and a half) life forms, each of which explains a key aspect of life on Earth. If an alien visitor were to collect ten souvenir life forms to represent life on earth, which would they be? This is the thought-provoking premise of Marianne Taylor's The Story of Life in 10 and a Half Species. Each life form explains a key aspect about life on Earth. From the sponge that seems to be a plant but is really an animal to the almost extinct soft-shelled turtle deemed extremely unique and therefore extremely precious, these examples reveal how life itself is arranged across time and space, and how humanity increasingly dominates that vision. Taylor, a prolific science writer, considers the chemistry of a green plant and ponders the possibility of life beyond our world; investigates the virus in an attempt to determine what a life form is; and wonders if the human--"a distinct and very dominant species with an inevitably biased view of life"-- could evolve in a new direction. She tells us that the giraffe was one species, but is now four; that the dusky seaside sparrow may be revived through "re-evolution," or cloning; explains the significance of Darwin's finch to evolution; and much more. The "half" species is artificial intelligence. Itself an experiment to understand and model life, AI is central to our future--although from the alien visitor's standpoint, unlikely to inherit the earth in the long run.

Drawing the Map of Heaven-Tanure Ojaide 2012 The celebrated Nigerian writer Tanure Ojaide relates here his experience of living in the United States where he has been based teaching and writing since 1996. Drawing the Map of Heaven picks up where his earlier memoir, Great Boys. An African Childhood which charted his upbringing in Nigeria by his Grandmother, left off. Less a purely personal tale and more a story of the many other African immigrants in the United States Ojaide in the text uses "we" to speak collectively for a traditionally communal society now residing in an individualistic setting. As much a reflection of an African background as an American experience Drawing the Map of Heaven is a unique portrait of the African in the United States

Story of Life-Saqib Rana 2019-10-16 Why is there so much pain in the world? Why is there no peace? So many people around the world are dying, hurting, suffering, and yearning for hope, freedom, justice, and peace. Why have we failed to help them? Why have we failed each other? Do we truly understand each other? Why do we still fight? Where is the love we speak of but fail to embody? The Story of Life, In a Tale of Words is a story-poem meant to reverberate the heartstrings of goodness within us. The Story of Life, In a Tale of Words strives to relinquish the curtain over our hearts that causes us to hate instead of love. We are all lost, we are all in pain, and we are all broken. But that pain is precisely what bonds us as a people, as kindred kind. The Story of Life, In a Tale of Words serves as a beacon of hope to remind us that together, we can help each other end the pain in all our hearts and in the world. Together. Open your heart to the Story of Life, and it will open its heart to you.

The Story of Earth & Life-Terence McCarthy 2013-07-10 Geologically speaking, southern Africa is without equal, a treasure house of valuable minerals with a geological history dating back some 3 600 million years. In addition, the evolution of plants and animals, especially mammals and dinosaurs, is well preserved in the region, which also probably has the best record of the origin of modern man. This book provides a fascinating insight into that remarkable history: how southern Africa, and to some extent the world, came to be the way it is - how its mineral deposits formed, its life evolved and its landscape was shaped. Along the way readers will be enthralled by accounts of the Big Bang that marked the beginning of time and matter, by drifting and colliding continents, folding and fracturing of rocks, meteors colliding with the Earth, the time when the Earth froze over, volcanic eruptions and the start of life. Anyone interested in the landscape and ecosystems in which we live will be intrigued to discover how our natural landmarks were formed, from the deserts of Namibia to the mountains of the Western Cape or Mpumalanga. Why is South Africa so rich in minerals? How did glacial deposits come to be found in the Karoo? Why did dinosaurs become extinct? How did mammals develop from reptiles? How closely related are we to the apes? The answers to many such questions are found in this lavishly illustrated volume. The authors also suggest how we can learn from the past in order to anticipate the future - for instance, to be able to predict earthquakes, deal with volcanic eruptions and meet the challenges of global climate change.

The Strings of My Heart-Beatrice Garcia 2012-07 The life and times of Beatrice Garcia is a truly fascinating and enthralling tale of the triumphs over adversities and hardships by this woman of faith. You can see how her trust in God made all the difference in the world to her and to her family. As the wife of a Pastor, her dedication to God, family, and the Church, is an inspiration to me and those who love her. I believe that those who do well only for themselves are remembered while they live, but those that do well for others achieve immortality. Ruben R. Garcia While books of the rich and famous, the creators and innovators, the movers and the shakers are numerous, there can never be a sweeter book to me, than the one that tells the story of my mother. This book captures the memories and resilience of a woman who kept the faith and that even to this day at age 96, continues to find strength and a reason to rejoice in the Lord Jesus Christ every day. Elizabeth Martin The story of Beatrice Garcia is an interesting and inspiring book. As you read her story you see the name of Jesus written in every event of her life. Her hardships and joys helped me realize that happiness does not come from material possessions but from the love and joy that God freely gives. My mother's life has truly been an inspiration to me, her friends and family. She is a true model of a virtuous Christian woman, strong in faith and full of wisdom and love. Alice Landeros

The Routledge International Handbook on Narrative and Life History-Ivor Goodson 2016-10-04 In recent decades, there has been a substantial turn towards narrative and life history study. The Story of My Life-Helen Keller 2016-02-18 "...every one who wishes to gain true knowledge must climb the Hill Difficulty alone, and since there is no royal road to the summit, I must zigzag it in my own way. I slip back many times, I fall, I stand still, I run against the edge of hidden obstacles, I

lose my temper and find it again and keep it better, I trudge on, I gain a little, I feel encouraged, I get more eager and climb higher and begin to see the widening horizon. Every struggle is a victory. One more effort and I reach the luminous cloud, the blue depths of the sky, the uplands of my desire." HELEN KELLER was born on June 27, 1880 in Tuscomb, Alabama. At nineteen months old an acute illness nearly took her life and left her deaf and blind. At the recommendation of Alexander Graham Bell, her parents contacted the Perkins Institute for the Blind in Boston, and Anne Sullivan was sent to tutor Helen. The story of their early years together, and of Helen's remarkable psychological and intellectual growth, is told in *The Story of My Life*, which first appeared in installments in *Ladies' Home Journal* in 1902. With Anne Sullivan, "Teacher," at her side, Helen Keller graduated from Radcliffe College in 1904, an extraordinary accomplishment for any woman of her time. Helen was dedicated to helping the blind and handicapped, raising funds for the American Foundation for the Blind and lobbying for commissions for the blind in thirty states. A women's rights activist, a Swedenborgian, a socialist, and a world-famous celebrity, Helen Keller received the Presidential Medal of Freedom and many honorary degrees. Her other books include *The World I Live In* (1908), *Midstream: My Later Life* (1929), *Helen Keller's Journal* (1938), and *Let Us Have Faith* (1940). She died in 1968. Her burial urn is in the National Cathedral in Washington, D.C.

Creating Character: Bringing Your Story to Life-William Bernhardt 2013-05-12 All fiction is character-driven, according to William Bernhardt, despite what you might have heard elsewhere. If your characters don't interest readers, even the most exciting plots will fail. "Action is character," Aristotle wrote, but what does that mean, and how can you use that fundamental principle to create dynamic fiction that will captivate readers? This book explains the relationship between character and plot, and how the perfect melding of the two produces a mesmerizing story. Using examples spanning from *The Odyssey* to *The Da Vinci Code*, Bernhardt discusses the art of character creation in a direct and easily comprehended manner. The book also includes exercises designed to help writers apply these ideas to their own work. William Bernhardt is the author of more than fifty novels, including the blockbuster Ben Kincaid series of legal thrillers. Bernhardt is also one of the most sought-after writing instructors in the nation. His programs have educated many authors now published by major houses. He is the only person to have received the Southern Writers Gold Medal Award, the Royden B. Davis Distinguished Author Award (U Penn) and the H. Louise Cobb Distinguished Author Award (OSU), which is given "in recognition of an outstanding body of work that has profoundly influenced the way in which we understand ourselves and American society at large." The Red Sneaker Writing Center is dedicated to helping writers achieve their literary goals. What is a red sneaker writer? A committed writer seeking useful instruction and guidance rather than obfuscation and attitude. Red sneakers get the job done, and so do red sneaker writers, by paying close attention to their art and craft, committing to hard work, and never quitting. Are you a red sneaker writer? Abraham-Joseph Blenkinsopp 2015-05-25 In this discursive commentary Joseph Blenkinsopp explores the story of Abraham -- iconic ancestor of Judaism, Christianity, and Islam -- as told in Genesis 11-25. Presented in continuous discussion rather than in verse-by-verse form, Blenkinsopp's commentary focuses on the literary and theological artistry of the narrative as a whole. Blenkinsopp discusses a range of issues raised in the Abraham saga, including confirmation of God's promises, Isaac's sacrifice and the death of Jesus, and Abraham's other beloved son, Ishmael. Each chapter has a section called Filling in the Gaps, which probes some of the vast amount of Jewish, Christian, and Islamic commentary that the basic Genesis text has generated through the ages. In an epilogue Blenkinsopp looks at Abraham in early Christianity and expresses his own views, as a Christian, on Abraham. Readers of Blenkinsopp's *Abraham: The Story of a Life* will surely come away with a deeper, richer understanding of this seminal ancient figure.

The Story of Life & the Environment- 2012 "The Story of Life & the Environment: An African Perspective is about the fragile miracle of life. It's a celebration of the Earth's rich and wonderful diversity - the species, populations, communities and ecosystems that surround us - and of nature's resilience. It unpacks the three major ecosystems: fresh water, the ocean and the land, and the teeming life each supports on and around Africa. It discusses evolution and the ever-branching tree of life; how systems work, how populations expand and contract, and how all the elements of life interact. And it tells the story of how humans originated in Africa, and how we have evolved to become modern people. The book sounds a warning about our human impact on the planet, which is fostering rapid climate change, as well as massive over-consumption and depletion of resources. The book is also about responsible planning and management of our environment and natural resources to redress damage and ensure sustainability. This is the story of life and the environment in Africa."-- Provided by publisher.

Life! Indeed Yes; But on Whose Terms? (the Story of Life) Exploring the Life/Choice Question in Our Discourse-Bonaventure C. Okoro 2010-08 **SUMMARY:** The nativity story as told by the angel Gabriel gives the prophetic account of the life and ministry of Jesus before His birth. It came to bring fulfillment the prophecies of Isaiah and Micah rendered 750 years earlier. The story has a very strident anti-abortion message since at the time of the annunciation Mary had not yet said yes to the angel Gabriel and God. All the events in the life of Jesus were already spelled out and so it was for John the Baptist, Jeremiah and for all of us. It is from that encounter and other texts, we know that life begins when God speaks it forth because His Word is spirit and life and not the prerogative of anyone not the least the Pro-lifers or those of Pro-choice. This work looks at the politics of choice; discusses when life begins and chronicles the landmark Supreme Court decision, *Roe v. Wade*, in 1973 that ushered in the current law of the land, which has led to the legalization of abortion as the law of the land in America. **BIOGRAPHY:** Dr. Bonaventure C. Okoro MD is an Internist in private practice in Toledo Ohio in the United States. Born in Nigeria, he did his medical education at the University of Medicine & Pharmacy in Cluj-Napoca Romania. After a brief practice in Nigeria, he did his training in Internal Medicine and Emergency Medicine at Howard University in Washington DC. Dr. Okoro now resides with his wife and four children in Ohio, USA and a member of Corner Stone church, a global ministry under the pastoral leadership of Bishop Michael Pitts. His time is spent in full time medical practice and is deeply involved in medical missionary work to different regions of the world.
