The Technological Singularity. Book Description:

The idea that human history is approaching a "singularity" -- that ordinary humans will someday be overtaken by artificially intelligent machines or cognitively enhanced biological intelligence, or both -- has moved from the realm of science fiction to serious debate.

Technological singularity - Wikipedia

The technological singularity—also, simply, the singularity—is a hypothetical point in time at which technological growth becomes uncontrollable and irreversible, resulting in unforeseeable changes to human civilization. According to the most popular version of the singularity hypothesis, called intelligence explosion, an upgradable intelligent agent will eventually enter a "runaway reaction" of self-improvement cycles, each new and more intelligent generation appearing more and more rapidly...

The technological singularity and the transhumanist dream

Many of those who call themselves transhumanists have been arguing for decades that the technological singularity could solve humanity’s greatest ills: cure all disease, produce clean energy that helps to win the fight against climate change, reduce the cost of producing and distributing food to end hunger and develop technologies to colonise space so as to overcome ...

What's the technological singularity? | HowStuffWorks

15/10/2008 · Computer technology advances at a faster rate than many other technologies. Computers tend to double in power every two years or so. This trend is related to Moore's Law, which states that transistors double in power every 18 months. Vinge says that at this rate, it's only a matter of time before humans build a machine that can "think" like a human.

Kurzweil Claims That the Singularity Will Happen by 2045

The singularity is that point in time when all the advances in technology, particularly in artificial intelligence (AI), will lead to machines that are smarter than human beings.

Technological Singularity: Definition, Examples and a

13/01/2020 · As new innovations build upon previous innovations and this growth curve reaches the tipping point, there could come a time where humanity is able to build an artificial intelligence on par with the cognitive and functional abilities of a human. This is referred to as the Technological Singularity, after which all models of growth stop working and an era of uncontrollable and ...
