Atmosphere in Space Cabins and Closed Environments-Karl Kammermeyer 2012-12-06 MANNED SPACE FLIGHT introduces into space travel parameters that are unique. Man can live without food for a reasonably long period; without water, the period becomes quite a bit shorter; but without air, the result-almost instantaneous-is death. This would make the atmosphere the most important consideration. In

fact, however, man needs all three components: oxygen, water, and food; and if anyone of them fails, he is doomed. With our space efforts approaching trips of several weeks in length and certainly heading for month-long journeys, it is most appropriate to ask: Are we ready to provide an adequate atmospheric milieu for the astronauts? The present volume represents the first integrated attempt to answer this question on a scientific level and on a broad basis of physical and mechanical, biological, biochemical and medical factors. The main features of this work were presented at a symposium of the Division of Industrial and Engineering Chemistry of the American Chemical Society, held in Atlantic City on September 13, 1965. The volume is an expanded and reorganized treatise based on, but not merely proceeding from, the symposium. Obviously, medical aspects are of paramount importance. A down-to-earth appraisal of the status quo, presented by Dr. E. M. Roth, shows that the problem of 100% oxygen atmosphere still is beset with

some uncertainty in the 200 to 500 mm. total cabin pressure range. Additionally, attention is called to inherent dangers of greatly increased flammability in such an atmosphere.

Mousetronaut-Mark Kelly 2012-10-09 A #1 New York Times bestseller "This little mouse may well inspire some big dreams." —Kirkus Reviews "In this picture book based on the space shuttle Endeavor...Meteor is one of the smallest mice, but the most hardworking...the values of being small, useful, solving problems, and working hard—as opposed to being big and strong—will inspire young readers." —School Library Journal "Inspired by this real-life mouse, Kelly's first children's book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors...textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life

adventure.” —Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with “mice-tronauts” on his first spaceflight aboard space shuttle Endeavour in 2001. Mousetronaut tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, Mousetronaut is a charming tale of perseverance, courage, and the importance of the small!

At Home in the World-

Michael Jackson 2000 Now in paperback Ours is an era of uprootedness, with fewer and fewer people living out their lives where they are born. At such a time, in such a world, what does it mean to be "at home?" Perhaps among a nomadic people, for whom dwelling is not synonymous with being housed and settled, the search for an answer to this question might lead to a new way of thinking about home and homelessness, exile and belonging. First published by Duke University Press in 1995, *At Home in the World* is the story of just such a search, chronicling Jackson's experience among the Warlpiri of the Tanami Desert in Central Australia where he

lived, worked, and traveled intermittently over three years. Blending narrative ethnography, empirical research, philosophy, and poetry, Jackson construes the meaning of home existentially, as a metaphor for the balance people try to strike between the world they call their own and the world they see as "other." Home is never a stable essence, therefore, but a constantly negotiated relationship between being closed and open, acting and being acted upon. At once a moving depiction of an aboriginal culture, and a meditation on the practice of anthropology, *At Home in the World* is a timely reflection on how, in defining home, we continue to define ourselves.
