2013-02-05 In this "heart-stopping" (Publishers Weekly) page-turner from New York Times bestselling author J.A. Jance, Ali Reynolds finds herself working against the police to clear two innocent names. Former reporter Ali Reynolds finds herself working against the police to add up the clues that connect one frightened teenager, two dead bodies, and \$300,000...with the body count rising. Hired to investigate the grisly murder of a gold-digging divorcée on behalf of the woman accused of the crime, Ali Reynolds is immediately drawn to the case of the secretive teenager who found the body. A. J. Sanders was in the Camp Verde desert to retrieve a

mystery box buried by his absent father—a box that turns out to be filled with hundreds of thousands of dollars' worth of poker chips. When a second body is found in the desert, it seems the three cases are more closely related than anyone could have imagined. Though Ali's friends in the police department grow increasingly irritated by her involvement, Ali must stop a ruthless killer from claiming another victim...before she is lost in this game of deadly stakes.

TV Guide- 2006

When Children Die-Institute of Medicine 2003-02-09 The death of a child is a special sorrow. No matter the circumstances, a child's death is a life-altering experience. Except for the child who dies suddenly and without forewarning, physicians, nurses, and other medical personnel usually play a central role in the lives of children who die and their families. At best, these professionals will exemplify "medicine with a heart." At worst, families' encounters with the health care system will leave them with enduring painful memories, anger, and regrets. *When Children Die* examines what we know about the needs of these children and their families, the extent to which such needs are "and are not" being met, and what can be done to provide more competent, compassionate, and consistent care. The book offers

recommendations for involving child patients in treatment decisions, communicating with parents, strengthening the organization and delivery of services, developing support programs for bereaved families, improving public and private insurance, training health professionals, and more. It argues that taking these steps will improve the care of children who survive as well as those who do not "and will likewise help all families who suffer with their seriously ill or injured child. Featuring illustrative case histories, the book discusses patterns of childhood death and explores the basic elements of physical, emotional, spiritual, and practical care for children and families experiencing a child's life-threatening illness or injury.

Deadly Roses-

Marvin Marable 2010-10-30
An autobiographical drama in which an innocent man paid his reputation and nearly his life for almost twenty years, Deadly Roses by Marvin Marable is a shocking tale of what happens when officials follow the wrong leads and guilty men have the means to cover their tracks and flee the country. Set between Atlanta and Palm Beach, the author's life was sent into turmoil soon after his divorce. Two weeks after his divorce was finalized, his ex-wife's best friend was murdered. While there wasn't compelling evidence to indict or arrest Marable in the deadly 1987 slaying, he was intensely scrutinized as a suspect. The aftermath of the extensive investigation, involving the FBI, the U.S. Attorney's Office, the Georgia Bureau of Investigation, and the Atlanta Police, changed

his life as well as his sense of security and justice. Unable to refute statements made against him upon the advice of counsel, Marable struggled for two decades until he ultimately became a witness for the prosecution. Visit the author's website www.deadlyroses.com.

The Volcano Book for Children, Mums, Dads and Teachers

Rick Lomas
2013-09-18 The Volcano Book for Children, Mums, Dads and Teachers is written for children who are fascinated by volcanoes. At the same time adults will also enjoy learning about volcanoes. The book tells you where you can go and see some volcanoes and which ones are the most deadly. Rick Lomas wrote this book because his eldest daughter Madeline kept asking him questions about volcanoes. Rick says: "When Madeline was about 7 years old she was quite shocked when she realised we had taken her on holiday to Lanzarote when she was just one year old. Madeline always liked to call Lanzarote,

'Volcano Island'. Even when she was quite little she would want to know how dangerous volcanoes were and where to go and see some. I guess when her younger sister Rosalie gets a little bit bigger she will be asking me similar questions too!" So this book is for children and for their parents too. Teachers will find this useful too. It is not too complicated, but at the same time no important points have been skipped over. It is almost impossible to talk about volcanoes without knowing what a pyroclastic flow or a lahar is, so that is all explained in here. The book concludes with a 'Volcano Dictionary' which explains all the technical terms that you might come across when learning about volcanoes. Rick was tempted to make this book a light hearted and fun book, but the truth is that volcanoes have killed thousands and thousands of people since the earth began. The Lake Toba eruption nearly wiped humans off the planet completely! Although the danger of death by volcano is fairly low these days, it is good to know what has happened in the past and

what could happen in the future. The unknown is what makes volcanoes so exciting. Hopefully you will have fun reading this and learn something at the same time. The book is aimed to be as entertaining and informative as it possibly can be whilst still being accurate and packed with good information. Here are some the topics covered: What is a Volcano? Magma Chambers What are Tectonic Plates? What is a Caldera? Active Volcanoes Dormant Volcanoes Extinct Volcanoes The Ring of Fire Are volcanos dangerous Lava Flow Pyroclastic Flow Lahars Poisonous Gases Volcanic Ash Different types of volcano Different Types of Volcanic Eruptions The nice things about volcanoes The top 10 volcanoes to go and see 1) Stromboli, Italy 2) Kilauea, Hawaii 3) Etna, Sicily, Italy 4) Teide, Tenerife, Spain 5) Mount Ruapehu, New Zealand

6) Mount Fuji, Japan 7) Cotopaxi, Ecuador 8) Sierra Negra, Galapagos 9) Yellowstone Supervolcano, Wyoming, USA 10) Montserrat, West Indies The top 10 most deadly volcanoes ever 1) Mount Pelée, Martinique 2) Krakatoa, Indonesia 3) Mount Tambora, Indonesia 4) Mount Vesuvius 5) Mount Unzen, Japan 6) Nevado del Ruiz, Columbia 7) Laki and Grimsvötn, Iceland 8) Santorini, Greece 9) Huaynaputina, Peru 10) Lake Toba, Indonesia Find out more about volcanoes Volcano Dictionary The book is most suitable for children age 8 onwards. There is no upper age limit as the book encourages the reader to find out more about volcanoes themselves.
