**Potatoes Not Prozac**-Kathleen Desmaisons 2012-10-01 Have you ever wondered why you can't say no to fattening foods or alcohol? Why you overspend or overwork, feel bloated, have mood swings or depression? The answer is not that you're lazy, self-indulgent or undisciplined. The problem lies in your body chemistry. Millions of people are sugar sensitive and the foods they turn to for comfort actually trigger feelings of exhaustion, hopelessness and low self-esteem. In her groundbreaking book, Kathleen DesMaisons, Ph.D., explains how certain food-dependent chemicals in the brain regulate our moods. To maintain mental and physical health our serotonin, beta-endorphins and blood sugar levels need to be kept in balance. We can achieve this by following DesMaison's inexpensive, all-natural nutritional plan. There is no regime of measurements or self-denial: you tailor the plan to your tastes and lifestyle. More than just a book about

food, this is a book about possibilities.

**The Hummingbird's Daughter**-Luis Alberto Urrea 2021-01-07

'Extraordinary . . . deeply felt and beautifully told' Observer It is 1889. Civil war is brewing in Mexico, and sixteen-year-old Teresita has just woken from the strangest dream - a dream that she has died. Only it was not a dream. This passionate and rebellious young woman has arisen from death with a power to heal - but it will take all her faith to endure the trials that await her and her family now that she has become the Saint of Cabora. The Hummingbird's Daughter is the story of a girl and a country grappling with their destiny. Two decades in the writing, the result is an epic, dazzling novel of love and loss, joy and sacrifice.

**Nutrition Challenge Badge**-Food and Agriculture Organization of the United Nations 2018-05-08 Food brings people together, providing a basis for sharing and enjoyment. Humans have always prepared special foods and dishes to mark celebrations and important events, from weddings to births, to the crowning of a new king or queen. However, food has a much more important role in our lives than just being the key to a celebration. Every human, animal and plant on Earth needs food to live, grow and reproduce. In fact, food is so fundamental to health and life that it is considered a basic human right. Each and every one of us should always be able to get the food we need to be healthy. Eating the right kinds of foods, in the right amounts, is vital for our health. In this Challenge Badge, you will learn what nutrients, vitamins and minerals different foods can give you. You will also learn how to follow a healthy diet and develop good eating habits. You will learn about the importance of food safety, and steps you can take to buy and store food safely. The booklet also explains the impacts your food choices have on the wider world, and how you can shop and cook in a more environmentally friendly way. Finally, the Badge gives ideas about how you can take action to make sure you and those around you can lead healthy and environmentally responsible lives. Take this booklet and EXPLORE, LEARN and DISCOVER - and while you're having fun, maybe you can even come up with some clever ways to spread the word about good nutrition. We hope

you will feel inspired to take action and do what you can to have a healthy and nutritious diet.

But if you're brave enough to look closer, then it's time to discover what slugs do with their slime, why flies throw up on your tea, how insects drink your blood and how a praying mantis bites its victim's head off!

**The Natural Way of Things**-Charlotte Wood 2016-06-28 "A Handmaid's Tale for the 21st century" (Prism Magazine), Wood's dystopian tale about a group of young women held prisoner in the Australian desert is a prescient feminist fable for our times. As the Guardian writes, "contemporary feminism may have found its masterpiece of horror." Drugged, dressed in old-fashioned rags, and fiending for a cigarette, Yolanda wakes up in a barren room. Verla, a young woman who seems vaguely familiar, sits nearby. Down a hallway echoing loudly with the voices of mysterious men, in a stark compound deep in the Australian outback, other captive women are just coming to. Starved, sedated, the girls can't be sure of anything—except the painful episodes in their pasts that link them. Drawing

strength from the animal instincts they're forced to rely on, the women go from hunted to hunters, along the way becoming unforgettable and boldly original literary heroines that readers will both relate to and root for. The Natural Way of Things is a lucid and illusory fable and a brilliantly plotted novel of ideas that reminds us of mankind's own vast contradictions—the capacity for savagery, selfishness, resilience, and redemption all contained by a single, vulnerable body. Winner 2016 Stella Prize 2016 Prime Minister's Literary Award in Fiction An Australian Indie Best Fiction Book & Overall Book of the Year Winner Finalist 2017 International Dublin Literary Award 2016 Voss Literary Prize 2016 Victorian Premier's Award 2016 The Miles Franklin Award

**Microbe Hunters**-Paul De Kruif 1926 Paul de Kruif's Microbe Hunters is a timeless dramatization of the scientists, bacteriologists, doctors, and medical technicians who discovered microbes and invented the vaccines to counter them. De Kruif reveals the now seemingly simple but really fundamental discoveries of science - for instance, how a microbe was first viewed in a clear drop of rain water, and when, for the first time ever, Louis Pasteur discovered that a simple vaccine could save a man from the ravages of rabies by attacking the microbes that cause it.

**Spectacular Special Effects**-Diana Kimpton 2002-01-01 A guide to the sensational secrets of special effects - from multi million-dollar computer magic in blockbuster movies to spectacular effects you can use in your own school play.

**Red Famine**-Anne Applebaum 2017-10-10 AN ECONOMIST BEST BOOK

**OF THE YEAR** From the author of the Pulitzer Prize-winning *Gulag* and the National Book Award finalist *Iron Curtain*, a revelatory history of one of Stalin's greatest crimes—the consequences of which still resonate today In 1929 Stalin launched his policy of agricultural collectivization—in effect a second Russian revolution—which forced millions of peasants off their land and onto collective farms. The result was a catastrophic famine, the most lethal in European history. At least five million people died between 1931 and 1933 in the USSR. But instead of sending relief the Soviet state made use of the catastrophe to rid itself of a political problem. In *Red Famine*, Anne Applebaum argues that more than three million of those dead were Ukrainians who perished not because they were accidental victims of a bad policy but because the state deliberately set out to kill them. Applebaum proves what has long been suspected: after a series of rebellions unsettled the province, Stalin set out to destroy the Ukrainian peasantry. The state sealed the republic's borders and seized all available food. Starvation set in rapidly, and people ate anything: grass, tree bark, dogs, corpses. In some cases, they killed one another for food. Devastating and definitive, *Red Famine* captures the horror of ordinary people struggling to survive extraordinary evil. Today, Russia, the successor to the Soviet Union, has placed Ukrainian independence in its sights once more. Applebaum's compulsively readable narrative recalls one of the worst crimes of the twentieth century, and shows how it may foreshadow a new threat to the political order in the twenty-first.

**How to Draw Horrible Science**-Tony De Saulles 2011 This isn't about turning kids into artists; it's about turning them into HORRIBLE artists. The amazing Tony De Saulles shares the secrets of his uniquely 'squishy' style. For everyone who's ever dreamed of drawing mad scientists, chopped-off fingers, sick chickens, farting cows and elephant poo. Definitely not for those who like to draw cuddly kittens, pretty flowers and fluffy bunnies...
