**Poetic Justice**-J. D. DuPuy 2013-05 The perfect gift for the lawyers in your life -- for law school graduation, birthdays, firm holiday gifts, retirement, or just because. More than 70 vignettes from life in the practice of law are rendered here as wryly humorous poems. Each one stands alone as the sort of snapshot one lawyer might forward along to another for a laugh or a knowing nod. Together, they comprise a collection to be treasured by anyone who has lived through law school, first jobs, thrilling victories, eye-opening disappointments, and the lifestyle particular to this career choice. This book is not about laughing at lawyers. It's about laughing with them. It's for everyone who's in on the joke: Everyone who has witnessed the madness and met the quirky characters in this field. Everyone who, even just for a second, has wondered if they should have gone to medical school, culinary school... anything other than law school. Everyone who has ever sat down at the end of an evening and thought, "No one would even believe me if I told them about my day." We believe you. Editorial reviews: "In many of the poems, the authors capture perfectly the oddities of law practice and law school. **Saving Lives, Buying Time**-Institute of Medicine 2004-10-09 For more than 50 years, low-cost antimalarial drugs silently saved millions of lives and cured billions of debilitating infections. Today, however, these drugs no longer work against the deadliest form of malaria that exists throughout the world. Malaria deaths in sub-Saharan Africa are currently just over one million per year are rising because of increased resistance to the old, inexpensive drugs. Although effective new drugs called artemisinin are available, they are unaffordable for the majority of the affected

population, even at a cost of one dollar per course. *Saving Lives, Buying Time: Economics of Malaria Drugs in an Age of Resistance* examines the history of malaria treatments, provides an overview of the current drug crisis, and offers recommendations on maximizing access to and effectiveness of antimalarial drugs. The book finds that most people in endemic countries will not have access to currently effective combination treatments, which should include an artemisinin, without financing from the global community. Without funding for effective treatment, malaria mortality could double over the next 10 to 20 years and transmission will intensify.
