In more recent years, this energy has focused downwards, into the ocean's inky depths and shadowy seabeds. This book is produced in collaboration with the National Maritime Museum. Based in Greenwich, London, this prestigious museum has the largest archives for maritime history in the world, comprising of more than 1.5 million items. Dedicated to conservation, educational outreach and cutting-edge research, the NMM is a world-leading institution in the study of maritime history. This beautifully illustrated full-color book includes an incredible selection of rare maps from their archives, from historic sea charts to topographic maps of the ocean floor.
